PART I. FINANCIAL INFORMATION

Item 1. Consolidated Financial Statements

The information furnished in the accompanying consolidated financial statements reflects all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim period presented.

Harris & Harris Group, Inc.[®] (the "Company," "us," "our" and "we"), is an internally managed venture capital company that has elected to operate as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). Certain information and disclosures normally included in the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted as permitted by Regulation S-X and Regulation S-K. Accordingly, they do not include all information and disclosures necessary for a fair presentation of our financial position, results of operations and cash flows in conformity with GAAP. The results of operations for any interim period are not necessarily indicative of the results for the full year. The accompanying consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

HARRIS & HARRIS GROUP, INC.

Notes to Consolidated Schedule of Investments

- (1) See "Footnote to Consolidated Schedule of Investments" on page 30 for a description of the "Valuation Procedures."
- (2) We classify "Cleantech" companies as those that seek to improve performance, productivity or efficiency, and to reduce environmental impact, waste, cost, energy consumption or raw materials using nanotechnology-enabled solutions. We classify "Electronics" companies as those that use nanotechnology to address problems in electronics-related industries, including semiconductors. We classify "Healthcare" companies as those that use nanotechnology to address problems in healthcare-related industries, including biotechnology, pharmaceuticals and medical devices. We use the term "Other" for companies that operate primarily in industries other than those within "Cleantech," "Electronics" and "Healthcare." We do not have any portfolio companies classified as "Other" as of June 30, 2011. In the first quarter of 2011, we renamed the sector classification "Electronics/Semiconductors" to "Electronics" and reclassified three companies, NeoPhotonics Corporation, Polatis, Inc., and Xradia, Inc., from a sector classification of "Other" to "Electronics" to reflect a broader definition of electronics to include photonics, metrology, and test and measurement. We also renamed the sector classification "Healthcare/Biotech" to "Healthcare."
- (3) Investments in unaffiliated companies consist of investments in which we own less than five percent of the voting shares of the portfolio company. Investments in non-controlled affiliated companies consist of investments in which we own five percent or more, but less than 25 percent, of the voting shares of the portfolio company, or where we hold one or more seats on the portfolio company's Board of Directors but do not control the company. Investments in controlled affiliated companies consist of investments in which we own 25 percent or more of the voting shares of the portfolio company or otherwise control the company.
- (4) The aggregate cost for federal income tax purposes of investments in unaffiliated privately held companies is \$27,131,646. The gross unrealized appreciation based on the tax cost for these securities is \$4,003,763. The gross unrealized depreciation based on the tax cost for these securities is \$6,065,497.
- (5) The aggregate cost for federal income tax purposes of investments in unaffiliated rights to milestone payments is \$3,291,750. The gross unrealized appreciation based on the tax cost for these securities is \$24,831. The gross unrealized depreciation based on the tax cost for these securities is \$0.
- (6) The aggregate cost for federal income tax purposes of investments in unaffiliated publicly traded companies is \$12,743,787. The gross unrealized appreciation based on the tax cost for these securities is \$38,910,671. The gross unrealized depreciation based on the tax cost for these securities is \$4,359,185.
- (7) We are subject to legal restrictions on the sale of our investment(s) in this company.
- (8) With our investment in the Series E round of financing, we received a warrant to purchase shares of common stock of up to 30 percent of the amount invested in the Series E round of financing of Bridgelux, Inc., depending on certain financial performance metrics of the company as of December 31, 2011, at a price per share of \$1.9056. The number of shares able to be purchased and beginning of the period for when this warrant is exercisable will be set upon receipt of the audited financial statements of the company for the 2011 fiscal year or upon the completion of an IPO or sale of the company, whichever comes first. This warrant is, therefore, a contingent asset as of June 30, 2011.
- (9) These investments are development-stage companies. A development-stage company is defined as a company that is devoting substantially all of its efforts to establishing a new business, and either it has not yet commenced its planned principal operations, or it has commenced such operations but has not realized significant revenue from them.

The accompanying notes are an integral part of this consolidated schedule.

<p style="text-align: center;">HARRIS & HARRIS GROUP, INC. CONSOLIDATED SCHEDULE OF INVESTMENTS AS OF JUNE 30, 2011 (Unaudited)</p>
--

- (10) Cobalt Technologies, Inc., also does business as Cobalt Biofuels.
- (11) With our investment in a convertible bridge note issued by Ensemble Therapeutics Corporation we received a warrant to purchase a number of shares of the class of stock sold in the next financing of Ensemble Therapeutics Corporation equal to \$149,539.57 divided by the price per share of the class of stock sold in the next financing of Ensemble Therapeutics Corporation. The ability to exercise this warrant is, therefore, contingent on Ensemble Therapeutics Corporation completing successfully a subsequent round of financing. This warrant shall expire and no longer be exercisable on September 10, 2015. The cost basis of this warrant is \$89.86.
- (12) Represents a non-income producing security. Investments that have not paid dividends or interest within the last 12 months are considered to be non-income producing.
- (13) Initial investment was made during 2011.
- (14) The lock-up period on 400,907 of our shares of NeoPhotonics Corporation currently expires on August 22, 2011. Our remaining 50,000 shares are free of lock-up restrictions as of the date of this filing.
- (15) The lock-up period on our 2,304,149 shares of Solazyme, Inc., currently expires on November 23, 2011.
- (16) The aggregate cost for federal income tax purposes of investments in non-controlled affiliated companies is \$50,748,092. The gross unrealized appreciation based on the tax cost for these securities is \$9,406,748. The gross unrealized depreciation based on the tax cost for these securities is \$11,954,020.
- (17) The aggregate cost for federal income tax purposes of investments in non-controlled affiliated publicly traded companies is \$2,000,000. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$53,333.
- (18) D-Wave Systems, Inc., is located and is doing business primarily in Canada. We invested in D-Wave Systems, Inc., through Parallel Universes, Inc., a Delaware company. Our investment is denominated in Canadian dollars and is subject to foreign currency translation. See "Note 3. Summary of Significant Accounting Policies."
- (19) On July 21, 2011, Innovalight, Inc., was acquired by E. I. du Pont de Nemours and Company ("DuPont"). See "Note 11. Subsequent Events."
- (20) With our investment in the Series B' financing of Kovio, Inc., we committed to investing up to \$592,114 if the company does not raise approximately \$5 million in equity or non-dilutive capital by September 8, 2011.
- (21) Our 2,666,667 shares of Champions Oncology, Inc., are currently not registered and are subject to restrictions on transfer. These shares will be currently transferable on October 1, 2011, under Rule 144 should Champions Oncology remain current in its filings with the SEC.
- (22) The aggregate cost for federal income tax purposes of investments in controlled affiliated companies is \$10,090,884. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$4,032,855.
- (23) The aggregate cost for federal income tax purposes of our U.S. government securities is \$32,197,584. The gross unrealized appreciation on the tax cost for these securities is \$1,263. The gross unrealized depreciation on the tax cost of these securities is \$0.

The accompanying notes are an integral part of this consolidated schedule.

Notes to Consolidated Schedule of Investments

- (1) See "Footnote to Consolidated Schedule of Investments" on page 30 for a description of the "Valuation Procedures."
- (2) We classify "Cleantech" companies as those that seek to improve performance, productivity or efficiency, and to reduce environmental impact, waste, cost, energy consumption or raw materials using nanotechnology-enabled solutions. We classify "Electronics/Semiconductors" companies as those that use nanotechnology to address problems in electronics-related industries, including semiconductors. We classify "Healthcare/Biotech" companies as those that use nanotechnology to address problems in healthcare-related industries, including biotechnology, pharmaceuticals and medical devices. We use the term "Other" for companies that operate primarily in industries other than those within "Cleantech," "Electronics/Semiconductors" and "Healthcare/Biotech." These industries include photonics, metrology, test and measurement, materials, mining, decorative products and personal care products.
- (3) Investments in unaffiliated companies consist of investments in which we own less than five percent of the voting shares of the portfolio company. Investments in non-controlled affiliated companies consist of investments in which we own five percent or more, but less than 25 percent, of the voting shares of the portfolio company, or where we hold one or more seats on the portfolio company's Board of Directors but do not control the company. Investments in controlled affiliated companies consist of investments in which we own 25 percent or more of the voting shares of the portfolio company or otherwise control the company.
- (4) The aggregate cost for federal income tax purposes of investments in unaffiliated privately held companies is \$37,480,266. The gross unrealized appreciation based on the tax cost for these securities is \$26,953,688. The gross unrealized depreciation based on the tax cost for these securities is \$8,118,624.
- (5) We are subject to legal restrictions on the sale of this investment.
- (6) Represents a non-income producing security. Investments that have not paid dividends or interest within the last 12 months are considered to be non-income producing.
- (7) These investments are development-stage companies. A development-stage company is defined as a company that is devoting substantially all of its efforts to establishing a new business, and either it has not yet commenced its planned principal operations, or it has commenced such operations but has not realized significant revenue from them.
- (8) On March 4, 2011, Amgen, Inc., and BioVex Group, Inc., announced the completion of the acquisition of BioVex Group, Inc. With our purchase of Series E Convertible Preferred Stock of BioVex Group, Inc., we received a contingent warrant that was cancelled as a result of the acquisition of BioVex Group, Inc., by Amgen, Inc.
- (9) Cobalt Technologies, Inc., also does business as Cobalt Biofuels.

The accompanying notes are an integral part of this consolidated schedule.

<p style="text-align: center;">HARRIS & HARRIS GROUP, INC. CONSOLIDATED SCHEDULE OF INVESTMENTS AS OF DECEMBER 31, 2010</p>

- (10) On June 9, 2010, Ensemble Discovery Corporation changed its name to Ensemble Therapeutics Corporation. With our investment in a convertible bridge note issued by Ensemble Therapeutics Corporation, we received a warrant to purchase a number of shares of the class of stock sold in the next financing of Ensemble Therapeutics Corporation equal to \$149,539.57 divided by the price per share of the class of stock sold in the next financing of Ensemble Therapeutics Corporation. The ability to exercise this warrant is, therefore, contingent on Ensemble Therapeutics Corporation completing successfully a subsequent round of financing. This warrant shall expire and no longer be exercisable on September 10, 2015. The cost basis of this warrant is \$89.86.
- (11) Initial investment was made during 2010.
- (12) On February 2, 2011, NeoPhotonics Corporation priced its initial public offering ("IPO") of 7,500,000 shares of common stock at \$11 per share.
- (13) On February 28, 2011, Harris & Harris Group sold its shares of Siluria Technologies, Inc., for an amount not materially different from the value of the shares as of December 31, 2010.
- (14) With our purchase of the Series B Convertible Preferred Stock of TetraVitae Bioscience, Inc., we received the right to purchase, at a price of \$2.63038528 per share, a number of shares in the Series C financing equal to the number of shares of Series B Preferred Stock purchased. The ability to exercise this right is contingent on TetraVitae Bioscience, Inc., completing successfully a subsequent round of financing. This warrant was cancelled as a result of the conversion of our preferred stock into common stock.
- (15) The aggregate cost for federal income tax purposes of investments in non-controlled affiliated companies is \$51,451,965. The gross unrealized appreciation based on the tax cost for these securities is \$8,260,861. The gross unrealized depreciation based on the tax cost for these securities is \$16,937,411.
- (16) On February 28, 2008, Lifco, Inc., merged with CFX Battery, Inc. The surviving entity was CFX Battery, Inc. On February 24, 2010, CFX Battery, Inc., changed its name to Contour Energy Systems, Inc.
- (17) D-Wave Systems, Inc., is located and is doing business primarily in Canada. We invested in D-Wave Systems, Inc., through D-Wave USA, a Delaware company. Our investment is denominated in Canadian dollars and is subject to foreign currency translation. See "Note 3. Summary of Significant Accounting Policies."
- (18) On November 9, 2010, Enumeral Technologies, Inc., changed its name to Enumeral Biomedical Corp.
- (19) Warrants expired unexercised subsequent to September 30, 2010.
- (20) The aggregate cost for federal income tax purposes of investments in controlled affiliated companies is \$9,715,153. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$2,655,476.
- (21) The aggregate cost for federal income tax purposes of our U.S. government securities is \$38,273,349. The gross unrealized appreciation on the tax cost for these securities is \$1,268. The gross unrealized depreciation on the tax cost of these securities is \$0.

The accompanying notes are an integral part of this consolidated schedule.

<p style="text-align: center;">HARRIS & HARRIS GROUP, INC. FOOTNOTE TO CONSOLIDATED SCHEDULE OF INVESTMENTS</p>

VALUATION PROCEDURES

I. Determination of Net Asset Value

The 1940 Act requires periodic valuation of each investment in the portfolio of the Company to determine its net asset value. Under the 1940 Act, unrestricted securities with readily available market quotations are to be valued at the current market value; all other assets must be valued at "fair value" as determined in good faith by or under the direction of the Board of Directors.

The Board of Directors is responsible for (1) determining overall valuation guidelines and (2) ensuring that the investments of the Company are valued within the prescribed guidelines.

The Valuation Committee, comprised of all of the independent Board members, is responsible for determining the valuation of the Company's assets within the guidelines established by the Board of Directors. The Valuation Committee receives information and recommendations from management. An independent valuation firm also reviews select portfolio company valuations. The independent valuation firm does not provide proposed valuations.

The values assigned to these investments are based on available information and do not necessarily represent amounts that might ultimately be realized when that investment is sold, as such amounts depend on future circumstances and cannot reasonably be determined until the individual investments are actually liquidated or become readily marketable.

II. Approaches to Determining Fair Value

Accounting principles generally accepted in the United States of America ("GAAP") define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). In effect, GAAP applies fair value terminology to all valuations whereas the 1940 Act applies market value terminology to readily marketable assets and fair value terminology to other assets.

The main approaches to measuring fair value utilized are the market approach and the income approach.

- Market Approach (M): The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. For example, the market approach often uses market multiples derived from a set of comparables. Multiples might lie in ranges with a different multiple for each comparable. The selection of where within the range each appropriate multiple falls requires judgment considering factors specific to the measurement (qualitative and quantitative).

- Income Approach (I): The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present value amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Those valuation techniques include present value techniques; option-pricing models, such as the Black-Scholes-Merton formula (a closed-form model) and a binomial model (a lattice model), which incorporate present value techniques; and the multi-period excess earnings method, which is used to measure the fair value of certain assets.

GAAP classifies the inputs used to measure fair value by these approaches into the following hierarchy:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Unobservable inputs for the asset or liability.

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement and are not necessarily an indication of risks associated with the investment.

III. Investment Categories

The Company's investments can be classified into five broad categories for valuation purposes:

- Equity-related securities;
- Long-term fixed-income securities;
- Short-term fixed-income securities;
- Investments in intellectual property, patents, research and development in technology or product development; and
- All other securities.

The Company applies the methods for determining fair value discussed above to the valuation of investments in each of these five broad categories as follows:

A. EQUITY-RELATED SECURITIES

Equity-related securities, including warrants, are fair valued using the market or income approaches. The following factors may be considered when the market approach is used to fair value these types of securities:

- Readily available public market quotations;
- The cost of the Company's investment;
- Transactions in a company's securities or unconditional firm offers by responsible parties as a factor in determining valuation;
- The financial condition and operating results of the company;
- The company's progress towards milestones.
- The long-term potential of the business and technology of the company;
- The values of similar securities issued by companies in similar businesses;
- Multiples to revenue, net income or EBITDA that similar securities issued by companies in similar businesses receive;
- The proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under applicable securities laws; and
- The rights and preferences of the class of securities we own as compared with other classes of securities the portfolio company has issued.

When the income approach is used to value warrants, the Company uses the Black-Scholes-Merton formula.

B. LONG-TERM FIXED-INCOME SECURITIES

1. **Readily Marketable: Long-term fixed-income securities** for which market quotations are readily available are valued using the most recent bid quotations when available.
2. **Not Readily Marketable: Long-term fixed-income securities** for which market quotations are not readily available are fair valued using the income approach. The factors that may be considered when valuing these types of securities by the income approach include:
 - Credit quality;
 - Interest rate analysis;
 - Quotations from broker-dealers;
 - Prices from independent pricing services that the Board believes are reasonably reliable; and
 - Reasonable price discovery procedures and data from other sources.

C. SHORT-TERM FIXED-INCOME SECURITIES

Short-term fixed-income securities are valued using the market approach in the same manner as long-term fixed-income securities until the remaining maturity is 60 days or less, after which time such securities may be valued at amortized cost if there is no concern over payment at maturity.

D. INVESTMENTS IN INTELLECTUAL PROPERTY, PATENTS, RESEARCH AND DEVELOPMENT IN TECHNOLOGY OR PRODUCT DEVELOPMENT

Such investments are fair valued using the market approach. The Company may consider factors specific to these types of investments when using the market approach including:

- The cost of the Company's investment;
- Investments in the same or substantially similar intellectual property or patents or research and development in technology or product development or offers by responsible third parties;
- The results of research and development;
- Product development and milestone progress;
- Commercial prospects;
- Term of patent;
- Projected markets; and
- Other subjective factors.

E. ALL OTHER SECURITIES

All other securities are reported at fair value as determined in good faith by the Valuation Committee using the approaches for determining valuation as described above.

For all other securities, the reported values shall reflect the Valuation Committee's judgment of fair values as of the valuation date using the outlined basic approaches of valuation discussed in Section III. They do not necessarily represent an amount of money that would be realized if we had to sell such assets in an immediate liquidation. Thus, valuations as of any particular date are not necessarily indicative of amounts that we may ultimately realize as a result of future sales or other dispositions of investments we hold.

<p style="text-align: center;">NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)</p>

NOTE 1. THE COMPANY

Harris & Harris Group, Inc. (the "Company," "us," "our" and "we"), is a venture capital company operating as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act") that specializes in making investments in companies commercializing and integrating products enabled by nanotechnology and microsystems. We operate as an internally managed company whereby our officers and employees, under the general supervision of our Board of Directors, conduct our operations.

Harris & Harris Enterprises, Inc.SM, ("Enterprises") is a 100 percent wholly owned subsidiary of the Company. Enterprises is taxed under Subchapter C of the Code (a "C Corporation"). Harris Partners I, L.P. is a limited partnership and, from time to time, may be used to hold certain interests in portfolio companies. The partners of Harris Partners I, L.P., are Enterprises (sole general partner) and the Company (sole limited partner). Enterprises pays taxes on any non-passive investment income generated by Harris Partners I, L.P. For the period ended June 30, 2011, there was no non-passive investment income generated by Harris Partners I, L.P. Enterprises, as the sole general partner, consolidates Harris Partners I, L.P. The Company consolidates its wholly owned subsidiary, Enterprises, for financial reporting purposes.

NOTE 2. INTERIM FINANCIAL STATEMENTS

Our interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and in conformity with accounting principles generally accepted in the United States of America ("GAAP") applicable to interim financial information. Accordingly, they do not include all information and disclosures necessary for a fair presentation of our financial position, results of operations and cash flows in conformity with GAAP. In the opinion of management, these financial statements reflect all adjustments, consisting of valuation adjustments and normal recurring accruals, necessary for a fair presentation of our financial position, results of operations and cash flows for such periods. The results of operations for any interim period are not necessarily indicative of the results for the full year. These financial statements should be read in conjunction with the financial statements and notes thereto contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

NOTE 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed in the preparation of the consolidated financial statements:

Principles of Consolidation. The consolidated financial statements have been prepared in accordance with GAAP and include the accounts of the Company and its wholly owned subsidiary. In accordance with GAAP and Regulation S-X, the Company may only consolidate its interests in investment company subsidiaries and controlled operating companies whose business consists of providing services to the Company. Our wholly owned subsidiary, Enterprises, is a controlled operating company which provides services to us and is, therefore, consolidated. All significant inter-company accounts and transactions have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the current period presentation.

Use of Estimates. The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from these estimates, and the differences could be material. The most significant estimates relate to the fair valuations of our investments.

Portfolio Investment Valuations. Investments are stated at "value" as defined in the 1940 Act and in the applicable regulations of the Securities and Exchange Commission ("SEC") and in accordance with GAAP. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) the fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. (See "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments.") At June 30, 2011, our financial statements include privately held and restricted publicly held venture capital investments valued at \$131,887,282. The fair values of our privately held and restricted publicly held venture capital investments were determined in good faith by, or under the direction of, the Board of Directors. Upon sale of investments, the values that are ultimately realized may be different from what is presently estimated. The difference could be material.

Cash. Cash includes demand deposits. Cash is carried at cost which approximates fair value.

Restricted Funds. At June 30, 2011, and December 31, 2010, we held \$2,564,774 and \$2,751, respectively, in "Restricted funds." At June 30, 2011, we held \$2,550,000 in a collateral account for our credit facility discussed in "Note 5. Debt." At June 30, 2011, and December 31, 2010, we also held \$14,774 and \$2,751, respectively, in security deposits for sublessors.

Unaffiliated Rights to Milestone Payments. At June 30, 2011, the outstanding milestone payments from Amgen, Inc.'s acquisition of Biovex Group, Inc., were valued at \$3,316,581. The milestone payments are valued using the present value of estimated proceeds from future payments that may be achieved. If all remaining milestones are met, we would receive \$9,526,393. There can be no assurances as to how much of this amount we will ultimately realize or when it will be realized, if at all.

Funds Held in Escrow from Sale of Investment. Funds held in escrow from Amgen, Inc.'s acquisition of BioVex Group, Inc., are valued using certain discounts applied to amounts withheld. Funds held in escrow will be released in March 2012 upon settlement of any indemnity claims and expenses related to the transaction. We would receive \$953,211 if the funds held in escrow are released in full.

Prepaid Expenses. We include prepaid insurance premiums and deferred financing charges in "Prepaid expenses." Prepaid insurance premiums are recognized over the term of the insurance contract. Deferred financing charges consist of fees and expenses paid in connection with the closing of credit facilities and are capitalized at the time of payment. Deferred financing charges are amortized over the term of the credit facility discussed in "Note 5. Debt." Amortization of the financing charges is included in "Interest and other debt expenses" in the "Consolidated Statements of Operations."

Property and Equipment. Property and equipment are included in "Other assets" and are carried at \$342,701 and \$364,202 at June 30, 2011, and December 31, 2010, respectively, representing cost, less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful lives of the premises and equipment. We estimate the useful lives to be five to ten years for furniture and fixtures, three years for computer equipment, and ten years for leasehold improvements.

Post Retirement Plan Liabilities. Unrecognized actuarial gains and losses are recognized as net periodic benefit cost pursuant to the Company's historical accounting policy for amortizing such amounts. Actuarial gains and losses that arise that are not recognized as net periodic benefit cost in the same periods will be recognized as a component of net assets.

Interest Income Recognition. Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis. When securities are determined to be non-income producing, the Company ceases accruing interest and writes off any previously accrued interest. These write-offs are recorded as a debit to interest income. During the three months and six months ended June 30, 2011, the Company earned \$70,781 and \$109,991, respectively, in interest on U.S. government securities, senior secured debt, participation agreements, non-convertible promissory notes, and interest-bearing accounts. During the three months and six months ended June 30, 2011, the Company recorded \$102,886 and \$185,453, respectively, of bridge note interest.

Loan Fees. Loan fees received in connection with our venture debt investments are capitalized. The unearned fee income is accreted into income based on the effective interest method over the life of the investment.

Stock-Based Compensation. The Company has a stock-based employee compensation plan. The Company accounts for the Harris & Harris Group, Inc. 2006 Equity Incentive Plan (the "Stock Plan") by determining the fair value of all share-based payments to employees, including the fair value of grants of employee stock options, and records these amounts as an expense in the Consolidated Statements of Operations over the vesting period with a corresponding increase to our additional paid-in capital. At June 30, 2011, and December 31, 2010, the increase to our operating expenses was offset by the increase to our additional paid-in capital, resulting in no net impact to our net asset value. Additionally, the Company does not record the tax benefits associated with the expensing of stock options because the Company currently intends to qualify as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986 (the "Code"). The amount of non-cash, stock-based compensation expense recognized in the Consolidated Statements of Operations is based on the fair value of the awards the Company expects to vest, recognized over the vesting period on a straight-line basis for each award, and adjusted for actual options vested and pre-vesting forfeitures. The forfeiture rate is estimated at the time of grant and revised, if necessary, in subsequent periods if the actual forfeiture rate differs from the estimated rate and is accounted for in the current period and prospectively. See "Note 7. Stock-Based Compensation" for further discussion.

Rent expense. Our lease at 1450 Broadway, New York, New York, commenced on January 21, 2010. The lease expires on December 31, 2019. The base rent is \$36 per square foot with a 2.5 percent increase per year over the 10 years of the lease, subject to a full abatement of rent for four months and a rent credit for six months throughout the lease term. Certain leasehold improvements were also paid for on our behalf by the landlord, the cost of which is accounted for as property and equipment and "Deferred rent" in the accompanying Consolidated Statements of Assets and Liabilities. These leasehold improvements are depreciated over the lease term. We apply these rent abatements, credits, escalations and landlord payments on a straight-line basis in the determination of rent expense over the lease term.

Realized Gain or Loss and Unrealized Appreciation or Depreciation of Portfolio Investments. Realized gain or loss is recognized when an investment is disposed of and is computed as the difference between the Company's cost basis in the investment at the disposition date and the net proceeds received from such disposition. Realized gains and losses on investment transactions are determined by specific identification. Unrealized appreciation or depreciation is computed as the difference between the fair value of the investment and the cost basis of such investment.

Income Taxes. As we intend to qualify as a RIC under Subchapter M of the Code, the Company does not provide for income taxes. The Company recognizes interest and penalties in income tax expense.

We pay federal, state and local income taxes on behalf of our wholly owned subsidiary, Harris & Harris Enterprises, Inc., which is a C corporation. See "Note 8. Income Taxes."

Foreign Currency Translation. The accounting records of the Company are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the rate of exchange of such currencies against U.S. dollars on the date of valuation. For the six months ended June 30, 2011, included in the net increase in unrealized appreciation on investments was an unrealized gain of \$139,237 resulting from foreign currency translation.

Securities Transactions. Securities transactions are accounted for on the date the transaction for the purchase or sale of the securities is entered into by the Company (i.e., trade date).

Concentration of Credit Risk. The Company places its cash and cash equivalents with financial institutions and, at times, cash held in checking accounts may exceed the Federal Deposit Insurance Corporation insured limit.

Recent Accounting Pronouncement. In May 2011, the Financial Accounting Standards Board ("FASB") updated Accounting Standards Code ("ASC") Topic 820, to clarify requirements on fair value measurements and related disclosures. This update is effective for interim and annual periods beginning after December 15, 2011. The additional requirements in this update will be included in the note on fair value measurements upon adoption. We do not expect this update to have a material impact on our financial condition or results of operations.

NOTE 4. BUSINESS RISKS AND UNCERTAINTIES

We invest in privately held companies, the securities of which are inherently illiquid. We also have investments in small publicly traded companies. Although these companies are publicly traded, their stock may not trade at high volumes and prices can be volatile, which may restrict our ability to sell our positions. These privately held and publicly traded businesses tend to not have attained profitability, and many of these businesses also lack management depth and have limited or no history of operations. Because of the speculative nature of our investments and the lack of a liquid market for and restrictions on transfers of privately held investments and some of our publicly traded investments, there is greater risk of loss than is the case with traditional investment securities.

We do not choose investments based on a strategy of diversification. We also do not rebalance the portfolio should one of our portfolio companies increase in value substantially relative to the rest of the portfolio. Therefore, the value of our portfolio may be more vulnerable to events affecting a single sector, industry or portfolio company and, therefore, subject to greater volatility than a company that follows a diversification strategy. As of June 30, 2011, our largest ten investments by value accounted for approximately 77 percent of the value of our equity-focused venture capital portfolio. Our largest investment, by value, Solazyme, Inc., a publicly traded company, accounted for approximately 35 percent of our equity-focused venture capital portfolio at June 30, 2011.

Approximately 62 percent of our equity-focused venture capital portfolio was comprised of securities of privately held companies. Because there is typically no public or readily ascertainable market for our interests in the small privately held companies in which we invest, the valuation of the securities in that portion of our portfolio is determined in good faith by our Valuation Committee, comprised of all of the independent members of our Board of Directors, in accordance with our Valuation Procedures and is subject to significant estimates and judgments. The determined value of the securities in our portfolio may differ significantly from the values that would be placed on these securities if a ready market for the securities existed. Any changes in valuation are recorded in our Consolidated Statements of Operations as "Net (decrease) increase in unrealized appreciation on investments." Changes in valuation of any of our investments in privately held companies from one period to another may be volatile.

NOTE 5. DEBT

On February 24, 2011, the Company established a new \$10 million three-year revolving credit facility (the "credit facility") with TD Bank, N.A. to be used in conjunction with its investments in venture debt.

The credit facility, among other things, matures on February 24, 2014, and generally bears interest, at the Company's option, based on (i) LIBOR plus 1.25 percent or (2) the higher of the federal funds rate plus fifty basis points (0.50 percent) or the U.S. prime rate as published in the Wall Street Journal. The credit facility generally requires payment of interest on a monthly basis and requires the payment of a non-use fee of 0.15 percent annually. All outstanding principal is due upon maturity. The credit facility is secured by cash collateral to be held in a non-interest bearing account at TD Bank. The credit facility contains affirmative and restrictive covenants, including: (a) periodic financial reporting requirements, (b) maintaining our status as a BDC (c) maintaining unencumbered, liquid assets of not less than \$7,500,000, (d) limitations on the incurrence of additional indebtedness, (e) limitations on liens, and (f) limitations on mergers and dissolutions. The credit facility is used to supplement our capital to make additional venture debt investments.

The Company's outstanding debt balance was \$2,550,000 and \$0, at June 30, 2011, and December 31, 2010, respectively. The weighted average annual interest rate for the six months ended June 30, 2011, was 1.5269 percent, exclusive of closing fees and for other prepaid expenses related to establishing the credit facility. The remaining capacity under the credit facility was \$7,450,000 at June 30, 2011. At June 30, 2011, the Company was in compliance with all financial covenants required by the credit facility.

NOTE 6. INVESTMENTS

At June 30, 2011, our financial assets were categorized as follows in the fair value hierarchy:

Description	June 30, 2011	Fair Value Measurement at Reporting Date Using:		
		Unadjusted Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
U.S. Government Securities	\$ 32,198,847	\$ 32,198,847	\$ 0	\$ 0
Privately Held Portfolio Companies:				
Preferred Stock	\$ 67,766,920	\$ 0	\$ 0	\$ 67,766,920
Bridge Notes	\$ 5,208,640	\$ 0	\$ 0	\$ 5,208,640
Warrants	\$ 737,400	\$ 0	\$ 0	\$ 737,400
Common Stock	\$ 0	\$ 0	\$ 0	\$ 0
Rights to Milestone Payments	\$ 3,316,581	\$ 0	\$ 0	\$ 3,316,581

NOTE 7. STOCK-BASED COMPENSATION

For the three months and six months ended June 30, 2011, the Company recognized \$557,806 and \$985,120, respectively, of compensation expense in the Consolidated Statements of Operations. As of June 30, 2011, there was approximately \$2,713,222 of unrecognized compensation cost related to unvested stock option awards. This cost is expected to be recognized over a weighted average period of approximately 1.1 years. For the three months and six months ended June 30, 2010, the Company recognized \$661,666 and \$1,214,938, respectively, of compensation expense in the Consolidated Statements of Operations. As of June 30, 2010, there was approximately \$5,521,421 of unrecognized compensation cost related to unvested stock option awards.

For the three months ended June 30, 2011, a total of 3,000 options were exercised for total proceeds to the Company of \$13,380. For the six months ended June 30, 2011, a total of 122,437 options were exercised for total proceeds to the Company of \$491,058.

A summary of the changes in outstanding stock options for the six months ended June 30, 2011, is as follows:

	<u>Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Grant Date Fair Value</u>	<u>Weighted Average Remaining Contractual Term (Yrs)</u>	<u>Aggregate Intrinsic Value</u>
Options Outstanding at January 1, 2011	3,860,748	\$ 7.81	\$ 4.76	5.60	\$ 125,208
Granted	0	\$ 0	\$ 0	0	
Exercised	(122,437)	\$ 4.01	\$ 1.67	0	
Forfeited or Expired	(349,194)	\$ 5.98	\$ 3.12	0	
Options Outstanding at June 30, 2011	<u>3,389,117</u>	\$ 8.13	\$ 5.04	5.47	\$ 301,017
Options Exercisable at June 30, 2011	<u>2,381,657</u>	\$ 8.67	\$ 5.45	5.53	\$ 148,215
Options Exercisable and Expected to be Exercisable at June 30, 2011	<u>3,367,743</u>	\$ 8.12	\$ 5.02	5.47	\$ 301,017

The aggregate intrinsic value in the table above with respect to options outstanding, exercisable and expected to be exercisable, is calculated as the difference between the Company's closing stock price of \$5.13 on the last trading day of the second quarter of 2011 and the exercise price, multiplied by the number of in-the-money options. This amount represents the total pre-tax intrinsic value that would have been received by the option holders had all options been fully vested and all option holders exercised their awards on June 30, 2011. The intrinsic value on the dates of exercise of 122,437 options exercised during the six months ended June 30, 2011, was \$142,842.

On June 2, 2010, the Company announced that its Compensation Committee has cancelled its previously scheduled meetings for the purpose of awarding stock options pursuant to the Stock Plan in 2010, and it will not award stock options for at least one year from the date of the announcement. The Compensation Committee also decided that any future grants of options, if they occur, will not be awarded at a price below our net asset value per share.

On August 3, 2011, the Compensation Committee decided that it will not award stock options pursuant to the Stock Plan for at least the remainder of 2011.

NOTE 8. INCOME TAXES

We have elected to be treated as a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code") and operate in a manner so as to qualify for the tax treatment applicable to RICs.

In order to qualify as a RIC, we must, in general, (1) annually, derive at least 90 percent of our gross income from dividends, interest, gains from the sale of securities and similar sources; (2) quarterly, meet certain investment diversification requirements; and (3) annually, distribute at least 90 percent of our investment company taxable income as a dividend. We may either distribute or retain our net capital gain from investments, but any net capital gain not distributed will be subject to corporate income tax and the excise tax described below. We will be subject to a four percent excise tax to the extent we fail to distribute at least 98 percent of our annual net ordinary income and 98.2 percent of our capital gain net income and would be subject to income tax to the extent we fail to distribute 100 percent of our investment company taxable income.

Because of the specialized nature of our investment portfolio, we generally can satisfy the diversification requirements under the Code if we receive a certification from the SEC that we are "principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available."

On July 22, 2011, we received SEC certification for 2010, permitting us to qualify for RIC treatment for 2010 (as we had for the years 1999 through 2009) pursuant to Section 851(e) of the Code. Although the SEC certification for 2010 was issued, there can be no assurance that we will qualify for or receive such certification for 2011 or subsequent years (to the extent we need additional certification) or that we will actually qualify for Subchapter M treatment in subsequent years. We qualified for RIC treatment in 2010 even without certification. In addition, under certain circumstances, even if we qualified for Subchapter M treatment in a given year, we might take action in a subsequent year to ensure that we would be taxed in that subsequent year as a C Corporation, rather than as a RIC. Because Subchapter M does not permit deduction of operating expenses against net capital gain, it is not clear that the Company and its shareholders have paid less in taxes since 1999 than they would have paid had the Company remained a C Corporation.

For the three months ended June 30, 2011, and 2010, we paid \$103 and \$0, respectively, in federal, state and local taxes. For the six months ended June 30, 2011, and 2010, we paid \$2,393 and \$2,632, respectively, in federal, state and local taxes. At June 30, 2011, and 2010, we had \$0 accrued for federal, state and local taxes payable by the Company.

We pay federal, state and local taxes on behalf of our wholly owned subsidiary, Harris & Harris Enterprises, Inc., which is taxed as a C Corporation. For the three months ended June 30, 2011, and 2010, our income tax expense for Harris & Harris Enterprises, Inc., was \$0 and \$0, respectively. For the six months ended June 30, 2011, and 2010, our income tax expense for Harris & Harris Enterprises, Inc., was \$1,385 and \$2,527, respectively.

NOTE 9. EMPLOYEE BENEFITS***Executive Mandatory Retirement Benefit Plan***

On May 5, 2011, the Board of Directors of Harris & Harris Group, Inc., terminated the Amended and Restated Executive Mandatory Retirement Benefit Plan. The plan was adopted in 2003 in order to begin planning for eventual management succession for individuals who are employed by us in a bona fide executive or high policy-making position. The plan provided benefits required by age discrimination laws as a result of the Company's policy of mandatory retirement when such individuals attained the age of 65. There are currently two individuals that qualify under the plan: Douglas W. Jamison, age 41, the Chairman and Chief Executive Officer, and Daniel B. Wolfe, age 34, the President. Since Mr. Jamison and Mr. Wolfe have over 20 years prior to attaining the age of 65, the plan was terminated. Our former President accrued benefits under this plan prior to his retirement, and the termination of this plan has no impact on his accrued benefits. At June 30, 2011, we had \$213,002 accrued for benefits for this former employee under the plan.

NOTE 10. CHANGE IN NET ASSETS PER SHARE

The following table sets forth the computation of basic and diluted per share net (decreases) increases in net assets resulting from operations for the three months and six months ended June 30, 2011, and June 30, 2010.

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2011	2010	2011	2010
Numerator for increase in net assets per share	\$ 21,222,221	\$ 2,150,952	\$ 20,096,062	\$ 3,838,683
Denominator for basic weighted average shares	30,999,579	30,864,491	30,959,503	30,862,202
Basic net increase in net assets per share resulting from operations	\$ 0.68	\$ 0.07	\$ 0.65	\$ 0.12
Denominator for diluted weighted average shares	31,017,329	30,903,625	30,977,558	30,901,438
Diluted net increase in net assets per share resulting from operations	\$ 0.68	\$ 0.07	\$ 0.65	\$ 0.12

For the three and six months ended June 30, 2011, the calculation of net increase in net assets resulting from operations per diluted share includes 17,750 and 18,055 stock options, respectively, because such options were anti-dilutive. All stock options may be dilutive in future periods in which there is a net increase in net assets resulting from operations, or in the event that there are significant increases in the average stock price in the stock market or significant decreases in the amount of unrecognized compensation cost.

NOTE 11. SUBSEQUENT EVENTS

On July 6, 2011, the Company made a \$1,032,058 follow-on investment in a privately held, equity-focused portfolio company.

On July 21, 2011, Innovalight, Inc., was sold to E. I. du Pont de Nemours and Company ("DuPont"). On July 21, 2011, we received repayment of our outstanding bridge notes of Innovalight plus accrued but unpaid interest of \$458,569. On August 5, we received our payment of \$4,088,820 for our shares of Innovalight, which did not include \$948,894 held in escrow.

On July 27, 2011, the Company made a \$500,000 follow-on investment in a privately held, equity-focused portfolio company.

As of June 30, 2011, we owned an aggregate of 2,304,149 shares of Solazyme. This position was valued at \$44,354,868 as of June 30, 2011. The key inputs to our valuation of Solazyme were the share price as of the close of trading on June 30, 2011, which was \$22.97, less a liquidity discount owing to the lock-up restrictions placed on the shares through an agreement with the underwriters of the IPO. As of August 5, 2011, Solazyme's closing price was \$17.61 per share.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this section should be read in conjunction with the Company's unaudited June 30, 2011, Consolidated Financial Statements and the Company's audited 2010 Consolidated Financial Statements and notes thereto.

Background

We incorporated under the laws of the state of New York in August 1981. In 1983, we completed an initial public offering ("IPO"). In 1984, we divested all of our assets except Otisville BioTech, Inc., and became a financial services company with the investment in Otisville as the initial focus of our business activity.

In 1992, we registered as an investment company under the 1940 Act, commencing operations as a closed-end, non-diversified investment company. In 1995, we elected to become a BDC subject to the provisions of Sections 55 through 65 of the 1940 Act.

Overview

We believe we provide five core benefits to our shareholders. First, we are an established firm with a positive track record of investing in venture capital-backed companies. Second, we provide shareholders with access to emerging nanotechnology-enabled companies that would otherwise be difficult to access or inaccessible for most current and potential shareholders. Third, we have an existing portfolio of companies at varying stages of maturity that provide for a potential pipeline of investment returns over time. Fourth, we are able to invest opportunistically in a range of types of securities to take advantage of market inefficiencies. Fifth, we provide access to venture capital investments in a vehicle that, unlike private venture capital firms, is both transparent and liquid.

We invest in companies enabled by nanotechnology and microsystems. We believe companies that leverage breakthroughs at the nanoscale are emerging as leaders in their respective industries. These companies primarily impact the clean technology, healthcare and electronics sectors. We focused the Company on making venture capital investments in companies that commercialize and integrate products enabled by nanotechnology in 2002. We believe this was the period of time when nanotechnology was beginning to emerge from its gestational phase to its commercial phase. We believe the coming decades will be the period of time when the commercial impact of nanotechnology will become widespread. We believe that as this occurs, our portfolio companies are well positioned to profit and that we will see investment returns as a result.

We define venture capital investments as the money and resources made available to privately held start-up firms and privately held and publicly traded small businesses with exceptional growth potential. We believe that we are the only U.S.-based, publicly traded venture capital company making investments exclusively in nanotechnology and microsystems. We believe we have invested in more nanotechnology-enabled companies than any other venture capital firm.

Nanotechnology is the study of structures measured in nanometers, which are units of measurement in billionths of a meter. Microsystems are measured in micrometers, which are units of measurement in millionths of a meter. We sometimes use "tiny technology" to describe both of these disciplines.

We consider a company to fit our investment thesis if the company employs or intends to employ technology that we consider to be at the microscale or smaller, and if the employment of that technology is material to its business plan. By making these investments, we seek to provide our shareholders with a specific focus on nanotechnology and microsystems through a portfolio of venture capital investments that address a variety of industries, markets and products.

We believe nanotechnology can be classified as a foundational or general-purpose technology. An innovation qualifies as a foundational technology if it has the potential for pervasive use in a wide range of sectors in ways that change the competitive dynamics in those sectors. Foundational technologies often take decades to fully diffuse through respective sectors. We believe the period of 2001 through 2010 was the first decade in the commercial development of nanotechnology products. According to the National Science Foundation and the National Nanotechnology Initiative, this decade witnessed average growth rates of nanotechnology-related research and development funding, peer-reviewed publications and patent applications of 23 percent to 35 percent. According to the same institutions, nanotechnology-enabled companies created over 300,000 jobs worldwide and introduced over \$200 billion worth of products. Each of these criteria grew at an average annual growth rate of 25 percent from 2000 to 2008. Our portfolio companies experienced similar growth during this period of time with aggregate revenues increasing 24 percent from 2007 to 2010, and 42 percent from 2009 to 2010.

We are currently in the second decade in the commercial development of nanotechnology products. We believe it will be this second decade and beyond where large portions of industry come to rely on nanotechnology as a fundamental enabler for advanced products.

Investment Strategy

We have discretion in the investment of our capital. We seek long-term capital appreciation through venture capital investments in equity-focused securities that we believe have exceptional growth potential. These businesses can range in stage from pre-revenue to generating positive cash flow. These businesses tend to be thinly capitalized, unproven, small companies that lack management depth, have little or no history of operations and are developing unproven technologies. These businesses may be privately held or publicly traded. We historically have invested in equity securities of these companies that are generally illiquid due to restrictions on resale and to the lack of an established trading market. We refer to our portfolio of investments in equity and equity-related securities in later sections of the Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") as our "equity-focused" portfolio of investments. We may take advantage of opportunities to generate near-term cash flow by investing in non-convertible debt securities of businesses. These businesses tend to be generating cash or have near-term visibility to reaching positive cash flow. We refer to our portfolio of investments in non-convertible debt in later sections of the MD&A as our "venture debt" portfolio of investments.

We are long-term investors. We seek to identify investment opportunities in industries and markets that will be growth opportunities three to seven years from the date of our initial investment. We expect to invest capital in these companies at multiple points in time subsequent to our initial investment. We refer to such investments as "follow-on" investments. Our efforts to identify and predict future growth industries and markets rely on patient and deep due diligence in nanotechnology-enabled innovations developed at universities and corporate and government research laboratories, and the examination of macroeconomic and microeconomic trends and industry dynamics. We believe it is the early identification of and investments in these growth opportunities that will lead to investment returns for our shareholders, growth of our net assets, and capital for us to invest in tomorrow's growth opportunities.

Involvement with Portfolio Companies

The 1940 Act requires that BDCs offer to "make available significant managerial assistance" to portfolio companies. We are actively involved with our portfolio companies through membership on boards of directors, as observers to the boards of directors and/or through frequent communication with management. As of June 30, 2011, we held at least one board seat or observer rights on 23 of our 29 equity-focused portfolio companies (79 percent).

We may hold two or more board seats in early-stage portfolio companies or those in which we have significant ownership. As of June 30, 2011, we held two board seats in Ancora Pharmaceuticals Inc. We may transition off of the board of directors to an observer role as our portfolio companies raise additional capital from new investors, as they mature or as they are able to attract independent members who have relevant industry experience and contacts. We also typically step off the board of directors upon the completion of an IPO. Our observer rights at board of directors meetings cease when companies complete an IPO. We held observer rights in NeoPhotonics and Solazyme until the completion of each company's IPO.

We may be actively involved in the formation and development of business strategies of our earliest stage portfolio companies. This involvement may include hiring management, licensing intellectual property, securing space and raising additional capital. We also provide managerial assistance to late-stage companies looking for potential exit opportunities by leveraging our status as a publicly traded company through our relationships with the banking and investment community and our knowledge and experience implementing and complying with Section 404 of the Sarbanes-Oxley Act.

Historical Investments and Current Investment Pace

Since our investment in Otisville in 1983 through June 30, 2011, we have made a total of 91 equity-focused venture capital investments. We have exited 62 of these 91 investments, realizing total gross proceeds of \$156,351,695 on our cumulative invested capital of \$82,201,082. These amounts include the receipt of our upfront payment from the sale of BioVex Group, Inc., to Amgen, Inc., in the first quarter of 2011, but do not include the potential milestone payments that could occur as part of this transaction at points in time in the future or payment of the portion of the upfront payment held in escrow as of June 30, 2011, nor do they reflect the value of our ownership of NeoPhotonics Corporation or Solazyme, Inc, which completed IPOs on February 2, 2011 and May 27, 2011, respectively. These amounts also do not include our proceeds from the sale of Innovalight, Inc., to E. I. du Pont de Nemours and Company ("DuPont") on July 21, 2011.

From August 2001 through June 30, 2011, all 49 of our initial equity-focused investments have been in companies commercializing or integrating products enabled by nanotechnology or microsystems. From August 2001 through June 30, 2011, we have invested a total (before any subsequent write-ups, write-downs or dispositions) of \$136,067,069 in these companies. We currently have 29 equity-focused companies in our portfolio. At June 30, 2011, from first dollar in, the average and median holding periods for these 29 investments were 5.0 years and 5.2 years, respectively. Historically, as measured from first dollar in to last dollar out, the average and median holding periods for the 62 investments we have exited were 4.1 years and 3.3 years, respectively.

The following is a summary of our initial and follow-on equity-focused investments in nanotechnology companies from January 1, 2007, to June 30, 2011. We consider a "round led" to be a round where we were the new investor or the leader of a set of investors in an investee company. Typically, but not always, the lead investor negotiates the price and terms of the deal with the investee company.

Investments in Our Equity-Focused Portfolio of Investments in Privately Held and Publicly Traded Companies

	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>Six Months Ended June 30, 2011</u>
Total Incremental Investments	\$ 20,595,161	\$ 17,779,462	\$ 12,334,051	\$ 9,560,721	\$ 9,757,586
No. of New Investments	7	4	2	3	2
No. of Follow-On Investment Rounds	20	25	29	27	16
No. of Rounds Led	3	4	5	5	2
Average Dollar Amount – Initial	\$ 1,086,441	\$ 683,625	\$ 174,812	\$ 117,069	\$ 1,500,000
Average Dollar Amount – Follow-On	\$ 649,504	\$ 601,799	\$ 413,256	\$ 341,093	\$ 422,349

During the second quarter of 2011, we used funds from our line of credit to make two follow-on investments totaling \$1,348,150 in one equity-focused portfolio company owing to these investments being in the form of short-term, non-convertible debt.

During the six months ended June 30, 2011, we made two venture debt investments. The following is a summary of our investments in venture debt to date.

**Investments in Our Venture Debt Portfolio of Investments
In Privately Held and Publicly Traded Companies**

	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>Six Months Ended June 30, 2011</u>
No. of Investments	0	0	0	1	2
Total Dollar Amount	\$ 0	\$ 0	\$ 0	\$ 500,000	\$ 900,000

Importance of Availability of Liquid Capital

As a publicly traded, internally managed venture capital company, our cash used to make investments and pay expenses is held by us and not called from external sources when needed. We do not use leverage or debt to supplement our cash in investments in equity and convertible debt securities. We may use leverage or debt to help fund our venture debt investments. These non-convertible debt securities have defined periods of time for return on investment. We believe that for these reasons, and for additional reasons discussed in detail in our Annual Report on Form 10-K for the year ended December 31, 2010, it is crucial that we operate the Company with a substantial balance of liquid capital.

Our Sources of Liquid Capital

The sources of liquidity that we use to make our investments are classified as primary and secondary liquidity. We do not include our credit facility as primary or secondary liquidity. Primary liquidity is comprised primarily of cash and U.S. Treasury securities. As of June 30, 2011, we held \$32,198,847 in U.S. government obligations, and we had an additional \$5,301,335 in cash. During the first quarter of 2011, we received the upfront payment of \$7.7 million from the acquisition of BioVex Group, Inc. This payment immediately added to our primary liquidity. Payments upon achieving milestones or expiration of the escrow period would also add to our primary liquidity in future quarters if these milestones are achieved successfully. The probability-adjusted value of the future milestone payments, as determined at the end of each fiscal quarter, is included as an asset on our Consolidated Statements of Assets and Liabilities and will be included in primary liquidity only when payment is received for achievement of the milestones. Subsequent to June 30, 2011, we added approximately \$4.6 million to our primary liquidity from proceeds received from the acquisition of Innovalight, Inc.

Our secondary liquidity is comprised of the stock of publicly traded companies. Since selling our position in NeuroMetrix, Inc., in 2005, the amount of secondary liquidity on our balance sheet has been minimal. The IPO of NeoPhotonics Corporation and Solazyme, Inc., and our investment in Champions Oncology, Inc. have substantially added to our total secondary liquidity of \$49,241,940 as of June 30, 2011. NeoPhotonics and Solazyme account for \$47,295,273 of this amount based on the closing price of each company as of June 30, 2011, less a discount to reflect that these shares are subject to lock-up restrictions. Champions Oncology accounts for \$1,946,667 of the total amount of secondary liquidity. Following the expiration of the lock-up restrictions on our shares of NeoPhotonics and Solazyme, our shares will be freely tradable at the discretion of management. Our shares of Champions Oncology will become freely tradable under Rule 144 on October 1, 2011, so long as Champions Oncology remains current in its filings with the SEC. A decision to sell our shares would result in the cash received from the sale of these assets being included in primary liquidity. Until that time, we will continue to include the value of our shares of our publicly traded portfolio companies in secondary liquidity unless the average trading volume of each company reaches sufficient levels for us to monetize our stock in such companies over a short period of time.

Should additional portfolio companies successfully complete IPOs or should we make additional investments in publicly traded companies, our source of secondary liquidity could materially increase. We believe these developments make it important, therefore, to examine both our primary and secondary liquidity when assessing the strength of our balance sheet and our future investment capabilities.

Recent and Pending Potential Liquidity Events from Our Portfolio as of June 30, 2011

During the first half of 2011, we had three liquidity events in the portfolio. On May 27, 2011, Solazyme, Inc., completed an IPO by selling 10,975,000 shares of common stock at \$18 per share. The common stock of Solazyme trades on the Nasdaq Global Select Market under the symbol "SZYM." As of June 30, 2011, we owned an aggregate of 2,304,149 shares of Solazyme. This position was valued at \$44,354,868 as of June 30, 2011. The key inputs to our valuation of Solazyme were the share price as of the close of trading on June 30, 2011, which was \$22.97, less a liquidity discount owing to the lock-up restrictions placed on the shares through an agreement with the underwriters of the IPO. As of August 5, 2011, Solazyme's closing price was \$17.61 per share.

On March 4, 2011, Amgen, Inc., completed its acquisition of BioVex Group, Inc. The acquisition included an upfront payment of \$425 million and milestone payments of up to \$575 million. On March 11, 2011, we received our upfront payment of \$7,702,470. As of June 30, 2011, our portion of the upfront payment that remains in escrow was \$953,211. As of June 30, 2011, we valued potential milestone payments and funds held in escrow from the sale of BioVex Group, Inc., at \$3,792,759. If all the remaining milestone payments were to be paid by Amgen, Inc., and the full amount held in escrow be released, we would receive \$10,479,604. We have not received any milestone payments as of June 30, 2011, and there can be no assurances as to how much of this amount we will ultimately realize in the future.

On February 2, 2011, NeoPhotonics Corporation completed an IPO by selling 7,500,000 shares of common stock at \$11 per share. The common stock of NeoPhotonics Corporation trades on the New York Stock Exchange under the symbol "NPTN." As of June 30, 2011, we owned an aggregate of 450,907 shares of NeoPhotonics Corporation. This position was valued at \$2,940,405 as of June 30, 2011. The key inputs to our valuation of NeoPhotonics Corporation were the share price as of the close of trading on June 30, 2011, which was \$6.92, and a liquidity discount owing to the lock-up restrictions placed on the shares through an agreement with the underwriters of the IPO. As of August 5, 2011, NeoPhotonics Corporation's closing price was \$6.59 per share.

On March 31, 2011, we stated, "One of our Cleantech companies and one of our Electronics companies received offers for acquisition of those companies through non-binding letters of intent. There can be no assurance that these companies will successfully complete a sale, and if the sale is completed, whether the price paid will generate returns for the Company. A variety of factors, including general business conditions and the price offered for the company in the sale, could lead one or more of these companies to terminate such efforts or could lead to the potential acquirers to rescind their non-binding offer to purchase those companies." During the second quarter of 2011, the Electronics company elected not to pursue the offer for acquisition through the non-binding letter of intent, but continued with discussions regarding a potential sale of the company. There can be no assurance that this company will successfully complete a sale, and if the sale is completed, whether the price paid will generate returns for the Company.

On July 21, 2011, DuPont completed its acquisition of Innovalight, Inc., the Cleantech company referred to in the prior paragraph. On July 21, 2011, we received repayment of our outstanding bridge notes of Innovalight plus accrued but unpaid interest of \$458,569. On August 5, we received our payment for our shares of Innovalight of \$4,088,820, which did not include \$948,894 held in escrow.

Maturity of Current Equity-Focused Venture Capital Portfolio

Our equity-focused venture capital portfolio is comprised of companies at varying maturities facing different types of risks. We have defined these levels of maturity and sources of risk as: 1) Early Stage/Technology Risk, 2) Mid Stage/Market Risk and 3) Late Stage/Execution Risk. We provide detailed descriptions of each of these classifications in our Annual Report on Form 10-K for the year ended December 31, 2010. The charts below show our assessment of the stage of maturity of the 29 companies in our equity-focused portfolio of investments and include the cost and value ascribed to the companies within each of these stages of maturity.

for our shares of Innovalight, which did not include held in escrow.

We seek to create a portfolio of companies that enables consistent flows of potential liquidity events in multiple industries in three sectors, cleantech, healthcare and electronics, which can be monetized as these companies mature. We believe a portfolio of companies focused on a diverse set of industries reduces the potential impact of cyclicalities of any one industry. Our current portfolio is comprised of companies at varying stages of maturity in a diverse set of industries within three sectors. We also include our positive exits from these portfolios. We consider NanoGram Devices to have been both a Cleantech and Healthcare portfolio company.

As our portfolio companies mature, we seek to invest in new early and mid-stage companies that may mature into mid and late-stage companies. This continuous progression creates a pipeline of investment maturities that may lead to future sources of positive contributions to net asset value per share as these companies mature and potentially experience liquidity and exit events. This pipeline is demonstrated by the distribution of our current early and mid-stage portfolio companies within each sector.

	Cleantech	Healthcare	Electronics
Late Stage	Solazyme Bridgelux Innovalight ⁽¹⁾ Nanosys	Metabolon	Xradia Molecular Imprints NeoPhotonics
Mid Stage	ABSMaterials Contour Energy Cobalt	Mersana Ensemble Champions Oncology	Adesto SiOnyx D-Wave Systems Nantero Cambrios Kovio
Early Stage	Laser Light Engines Produced Water Absorbents Nextreme Ultora	Ancora Enumeral	
Realized Positive Exits	Siluria	NanoGram Devices BioVex ⁽²⁾	

Note: Portfolio companies and stage classifications as of June 30, 2011. Table does not include portfolio companies valued at \$0 as of June 30, 2011.

(1) Innovalight was acquired by DuPont on July 21, 2011.

(2) A portion of the potential amount we will receive from the sale of BioVex remains unrealized as of June 30, 2011. Please refer to the section titled, "Recent and Potential Pending Liquidity Events from Our Portfolio as of June 30, 2011," for more information.

We expect some of our portfolio companies to transition between stages of maturity over time. This transition may be forward if the company is maturing and is successfully executing its business plan or may be backward if the company is not successfully executing its business plan or decides to change its business plan substantially from its original plan. Transitions backward are commonly accompanied by an increase in non-performance risk, which reduces valuation. We discuss non-performance risk and its implications on value below in the section titled "Valuation of Investments."

During the second quarter of 2011, we transitioned Adesto Technologies, Inc., and Cobalt Technologies, Inc., from early-stage companies to mid-stage companies, and we classified our two new investments, Champions Oncology, Inc., and Produced Water Absorbents, Inc., as a mid-stage company and an early-stage company, respectively.

Current Business Environment

The second quarter ended mixed in the public markets following two quarters of broad increases in value. While the IPO market had its first consecutive three quarters of double-digit numbers of companies going public since 2007, the number of companies achieving a liquidity event decreased from the second quarter of 2010. The current market for liquidity events remains highly stratified. Large IPOs continue to have a much greater likelihood of success than small IPOs. Additionally, the IPO market appears to have an increased appetite for risk for growth stories, such as in social media/networking and biofuels/biochemicals, but very little risk for more traditional stories. Furthermore, select few venture capital firms have successfully raised capital and data point to further contraction ahead for the venture capital industry. According to the National Venture Capital Association and Thomson Reuters, U.S. venture capital fundraising during the first half of 2011 totaled \$10.4 billion from 76 funds, a 70 percent increase by dollars compared to the first half of 2010, but a 15 percent decrease by number of funds, marking the lowest number of funds garnering commitments since the first half of 1995. This trend is in part owing to the closely watched 10-year benchmark for venture capital returns that stood at minus 0.1 percent as of March 31, 2011, which is the most recent data available for this statistic from Cambridge Associates, LLC.

The current business environment is also complicated by global economic uncertainty and regional unrest. It remains unclear if and how the debt crisis in Europe will spread from Greece, Portugal, Italy, Ireland and Spain, to other countries in the region or beyond. On August 5, 2011, Standard & Poor's downgraded the U.S. credit rating to AA+ from its top rank of AAA. It is unclear if the rising budget deficits in the United States will result in further downgrades in its credit rating, a slowing of worldwide economic growth or even trigger a global financial crisis. This outcome would be heightened potentially should an alternative to U.S. Treasury securities emerge as the global safe-haven for invested capital or should large holders of these securities, such as China, decide to divest of them in large quantities or in full. It is unclear how regional unrest will affect the global economy should it persist and/or expand beyond northern Africa and the Middle East. All of this uncertainty could lead to a broad reduction in risk taken by investors and corporations, which could reduce further the capital available to our portfolio companies, could affect the ability of our portfolio companies to build and grow their respective businesses, and could decrease the liquidity options available to our portfolio companies.

Historically, difficult venture environments have resulted in a higher than normal number of companies not receiving financing and being subsequently closed down with a loss to venture investors, and other companies receiving financing but at significantly lower valuations than the preceding financing rounds. This issue is compounded by the fact that many existing venture capital firms have few remaining years of investment and available capital owing to the finite lifetime of the funds managed by these firms. Additionally, even if a firm was able to raise a new fund, commonly new funds are not permitted to invest new funds in existing investments. This limitation of available capital can lead to fractured syndicates of investors. A fractured syndicate can result in a portfolio company being unable to raise additional capital to fund operations. This issue is especially acute in capital-intensive sectors that are enabled by nanotechnology, such as cleantech, healthcare and electronics. The portfolio company may be forced to sell before reaching its full potential or be shut down entirely if the remaining investors cannot financially support the company. As such, the currently improving exit environment for venture-backed companies through IPOs and merger and acquisition transactions and the currently improving public markets in general may not translate to an increase in the available capital to venture-backed companies, particularly those that have investments from funds that are in the latter stage of life unless the markets continue to improve for some time into the future.

Our overall goal remains unchanged. We want to maintain our leadership position in investing in nanotechnology and microsystems and to increase our net asset value. The current environment for venture capital financings continues to favor those firms that have capital to invest regardless of the stage of the investee company. We continue to finance our new and follow-on equity and convertible debt investments from our cash reserves, the majority of which are currently invested in U.S. Treasury obligations. We believe the turmoil of the venture capital industry and the current economic climate provide opportunities to invest this capital at historically low valuations in equity and convertible debt securities and at high yields in non-convertible debt securities of new and existing privately held and publicly traded companies of varying maturities.

Valuation of Investments

We value our privately held venture capital investments each quarter as determined in good faith by our Valuation Committee, a committee of all the independent directors, within guidelines established by our Board of Directors in accordance with the 1940 Act. (See "Footnote to Consolidated Schedule of Investments" contained in "Consolidated Financial Statements.")

The values of privately held, venture capital-backed companies are inherently more difficult than publicly traded companies to assess at any single point in time because securities of these types of companies are not actively traded. We believe, perhaps even more than in the past, that illiquidity, and the perception of illiquidity, can affect value. Management believes further that the long-term effects of the difficult venture capital market and difficult, but improving, exit environments will continue to affect negatively the fundraising ability of weak companies regardless of near-term improvements in the overall global economy and public markets, and that these factors can also affect value.

In each of the years in the period 2007 through 2010, and for the six months ended June 30, 2011, the Company recorded the following gross write-ups in privately held securities as a percentage of net assets at the beginning of the year ("BOY"), gross write-downs in privately held securities as a percentage of net assets at the beginning of the year, and change in value of privately held portfolio securities as a percentage of net assets at the beginning of the year.

Gross Write-Ups and Write-Downs of the Privately Held Portfolio

	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>Six Months Ended June 30, 2011</u>
Net Asset Value, BOY	\$ 113,930,303	\$ 138,363,344	\$ 109,531,113	\$ 134,158,258	\$ 146,853,912
Gross Write-Downs During Year	\$ (7,810,794)	\$ (39,671,588)	\$ (12,845,574)	\$ (11,391,367)	\$ (8,473,787)
Gross Write-Ups During Year	\$ 11,694,618	\$ 820,559	\$ 21,631,864	\$ 30,051,847	\$ 13,133,530
Gross Write-Downs as a Percentage of Net Asset Value, BOY	(6.86)%	(28.67)%	(11.7)%	(8.5)%	(5.7)%
Gross Write-Ups as a Percentage of Net Asset Value, BOY	10.26%	0.59%	19.7%	22.4%	8.9%
Net Change as a Percentage of Net Asset Value, BOY	3.40%	(28.08)%	8.0%	13.9%	3.2%

From March 31, 2011, to June 30, 2011, the value of our equity-focused venture capital portfolio, including our rights to potential future milestone payments from the sale of BioVex Group, Inc. to Amgen Inc., increased by \$30,888,521, from \$99,685,749 to \$130,574,270. This increase results primarily from the increase in value of our shares of Solazyme, Inc., of \$21,106,005 following the IPO of the company in the second quarter of 2011. Net of our position in Solazyme, Inc., the remaining companies and rights to milestone payments from companies formerly in our equity-focused portfolio increased in value from March 31, 2011, to June 30, 2011, by \$9,782,516, owing primarily to new and follow-on investments of \$8,121,412, increases in unrealized appreciation of \$10,630,972, increases in net accrued bridge note interest of \$98,915, offset by increases in unrealized depreciation of \$8,578,248 and the sale of our investments in Questech Corporation and PolyRemedy, Inc.

We note that our Valuation Committee and ultimately our Board of Directors take into account multiple sources of quantitative and qualitative inputs to determine the value of our privately held portfolio companies.

We also note that our Valuation Committee does not set the value of freely tradable publicly traded portfolio companies. As of June 30, 2011, our shares of each of our two publicly traded companies, NeoPhotonics Corporation and Solazyme, Inc., were not freely tradable owing to lock-up restrictions imposed by the underwriters of the IPOs. A discount for illiquidity of \$179,871 was applied to the value of our shares of NeoPhotonics Corporation of \$3,120,276 to determine the value of these shares of \$2,940,405 as of June 30, 2011. A discount for illiquidity of \$8,571,434 was applied to the value of our shares of Solazyme, Inc., of \$52,926,302 to determine the value of these shares of \$44,354,868 as of June 30, 2011.

The key inputs that led to the increase in unrealized appreciation of our portfolio companies net of Solazyme, Inc., of \$10,630,972 primarily included the price per share of new rounds of financing, written offers from current investors to purchase shares from other investors and the price paid by DuPont in its acquisition of Innovalight.

As part of the valuation process, we consider non-performance risk. Non-performance risk is the risk that a portfolio company will be: (a) unable to raise capital, will need to be shut down and will not return our invested capital; or (b) able to raise capital, but at a valuation significantly lower than the implied post-money valuation. Our best estimate of the non-performance risk of our portfolio companies has been quantified and included in the valuation of the companies as of June 30, 2011, and this estimate accounts for the primary source of the increase in unrealized depreciation of \$8,578,248. In the future, as these companies receive terms for additional financings or if they are unable to receive additional financing and, therefore, proceed with sales or shutdowns of the business, we expect the contribution of the discount for non-performance risk to vary in importance in determining the values of our securities of these companies. As of June 30, 2011, non-performance risk was a significant factor in determining the values of 10 of our 29 equity-focused portfolio companies. These 10 companies accounted for approximately \$31.6 million of the total value of our privately held venture capital portfolio. We increased the non-performance risk, thereby decreasing the value, of nine companies. We maintained the same level of non-performance risk for one company. We removed the discount for non-performance risk as a significant input to value in three companies due to the terms of recent or pending financing events.

As of June 30, 2011, our top ten investments by value accounted for approximately 77 percent of the value of our equity-focused venture capital portfolio.

TOP TEN EQUITY-FOCUSED INVESTMENTS BY VALUE

Company Name	Value as of June 30, 2011	Cumulative % of Equity-Focused Venture Capital Portfolio
Solazyme, Inc.	\$44,354,868	35%
Adesto Technologies Corp.	\$9,202,887	42%
Bridgelux, Inc.	\$7,962,852	48%
Xradia, Inc.	\$7,213,484	54%
Molecular Imprints, Inc.	\$5,591,725	58%
Innovalight, Inc.	\$5,029,251	62%
SiOnyx, Inc.	\$4,899,295	66%
Metabolon, Inc.	\$4,716,167	70%
Contour Energy Systems, Inc.	\$4,636,260	74%
Laser Light Engines, Inc.	\$3,792,764	77%

77 Percent of Value of Equity-Focused Venture Capital Portfolio

Assessment of Venture Capital Investment Portfolio as of June 30, 2011

As a foundational technology, nanotechnology is applicable across a diverse set of sectors, including clean technology, or cleantech, healthcare, and electronics. We have built a portfolio of investments in each of these sectors comprised of companies that address today's growth markets and what we believe could be tomorrow's growth opportunities. The value and cost of our equity-focused portfolio is currently distributed among the three sectors as follows:

In the first quarter of 2011, we renamed the sector classification "Electronics/Semiconductors" to "Electronics" and reclassified three companies, NeoPhotonics Corporation, Polatis, Inc., and Xradia, Inc., from a sector classification of "Other" to "Electronics" to reflect a

broader definition of electronics to include photonics, metrology, and test and measurement. We also renamed the sector classification "Healthcare/Biotech" to "Healthcare."

The chart below compares the values of our venture capital investments in our Cleantech, Healthcare and Electronics portfolios as of June 30, 2011, and as of March 31, 2011.

Note: Our one investment, Questech, which is classified as "Other" and valued at \$436,642 as of March 31, 2011, is included with "Electronics." We sold our investment in Questech in the second quarter of 2011.

We note that the amount in Healthcare does not include our rights to potential future milestone payments from the sale of BioVex Group, Inc., to Amgen, Inc. These rights were valued at \$3,316,581 and \$3,291,750 as of June 30, 2011, and March 31, 2011, respectively.

We have and may continue to make investments outside these sectors, and we may not maintain these sectors or the weightings within these sectors in future quarters.

Assessment of Our Cleantech Portfolio as of June 30, 2011

We classify companies in our Cleantech portfolio as those that seek to improve performance, productivity or efficiency, and to reduce environmental impact, waste, cost, energy consumption or raw materials using nanotechnology-enabled solutions. Cleantech is a term used commonly to describe products and processes that solve global problems related to resource constraints. We believe macroeconomic and microeconomic trends including ongoing growth in consumption of energy and resources, energy security concerns and volatility of commodity prices create attractive investment opportunities in cleantech. We believe nanotechnology enables innovation in cleantech markets through:

- **New Approaches to Production:** Nanotechnology-enabled methods of production can enable lower energy use at lower cost and operate with better performance than current methods of production.
- **New Materials:** New materials enable the development of new products that overcome inherent limitations of existing technology and processes.

We continue to believe we are positioned well to take advantage of today's growth markets within cleantech. We have been early investors in many of these markets. Our initial investments in biofuels in 2004 (Solazyme), light-emitting diodes in 2005 (Bridgelux) and batteries in 2007 (Contour Energy), now represent three of our top ten investments by value. These companies achieved record revenue growth in 2010 and continue to make progress in their respective markets.

We also believe we have a pipeline of companies that are developing solutions for growth markets that are emerging today or may develop in future years such as ground-water and other environmental remediation (ABSMaterials), renewable chemicals (Cobalt) and alternative sources for high-intensity light (Laser Light Engines). In the second quarter of 2011, we invested in a new cleantech company, Produced Water Absorbents, Inc. ("PWA"), a spinout from ABSMaterials, Inc. PWA is developing nanoglass materials that are able to remediate contaminated water that is a by-product of drilling for oil and hydraulic fracturing for natural gas. The table below shows the breakdown of our Cleantech portfolio as of June 30, 2011, based on stage of maturity of the investment including the year of our initial investment in each of the companies.

Cleantech	Level of Maturity		
	Early	Mid	Late
Companies	Produced Water Absorbents (2011) Ultora (2010) TetraVita (2008) Laser Light Engines (2008) Nextreme (2004) CrystalIS (2004)	ABSMaterials (2010) Contour Energy (2007) Cobalt (2008)	Innovalight (2006) Bridgelux (2005) Nanosys (2003) Solazyme (2004)
Cost	\$12,541,903	\$5,277,063	\$20,974,652
Value	\$4,994,928	\$6,700,524	\$59,522,706
Percentage of Cleantech Portfolio	7.0%	9.4%	83.6%

Many of our Cleantech portfolio companies are generating commercial revenues and/or have entered into partnerships and joint development agreements with large corporations. We include some of the commercial developments from these portfolio companies during the second quarter below.

Solazyme

On May 27, 2011, Solazyme completed an IPO by selling 10,975,000 shares of common stock at \$18 per share.

On June 20, 2011, Solazyme announced the successful test flight of a MH 60S Seahawk helicopter fueled with a 50:50 blend of algal-derived Solajet HRJ-5® jet fuel.

On June 30, 2011, Solazyme announced it expanded its distribution channels for its Algenist line of cosmetics to include Sephora Canada and The Shopping Channel.

ABSMaterials

In April 2011, field testing by DOE's National Energy Technology Laboratory confirmed that ABSMaterials' Osorb material could remove more than 99 percent of oil and grease from water, as well as more than 90 percent of toxic substances such as benzene, toluene, ethylbenzene and xylenes.

In June 2011, ABSMaterials noted the spinout and financing of its subsidiary, Produced Water Absorbents, Inc.

Contour Energy

In June 2011, Contour Energy announced the close of a Series C round of financing led by EDBi, the investment arm of the government of Singapore.

Cobalt

In May 2011, Cobalt announced the close of a Series D round of financing led by the Whittemore Collection Ltd., the investment vehicle of Parsons & Whittemore.

Innovalight

In July 2011, Innovalight announced it had been acquired by DuPont. Details of this transaction are included in the section titled, "Recent and Pending Potential Liquidity Events from Our Portfolio as of June 30, 2011."

We believe the macroeconomic and microeconomic dynamics that supported our thesis for historical investments in cleantech and the potential for nanotechnology to impact cleantech-related markets will continue for the foreseeable future. Some of the market opportunities we are currently investigating for investment opportunities include energy efficiency, energy storage and new methods for production, extraction and purification of high-value materials.

Assessment of Healthcare Portfolio as of June 30, 2011

We classify companies in our Healthcare portfolio as those that use nanotechnology to address problems in healthcare-related industries, including biotechnology, pharmaceuticals and medical devices. We believe macroeconomic and microeconomic trends including an aging population, increasing life expectancy, increasing prosperity that drives efforts to extend life, the increased global reach of disease and the need to address exponential growth of expenses of entitlement programs in some wealthy countries create attractive investment opportunities in healthcare. We believe nanotechnology enables innovation in healthcare markets through:

- **Engineering of Biological Systems:** The ability to study, optimize, and engineer biological systems at the nanoscale enables the use of biological systems for diagnosis and treatment of disease.
- **Convergence of Multiple Disciplines:** Much of the exciting work in nanotechnology is enabled by the convergence of the knowledge from multiple scientific disciplines. This convergence enables advances in healthcare that could not otherwise occur within one discipline.

New Tools: Complex biological processes include and are often the result of nanoscale phenomena. The ability to study and interpret these processes requires new tools. The information produced by these tools may advance the understanding and facilitate the engineering of biological systems.

We continue to believe we are positioned well to take advantage of today's growth markets within healthcare having been early investors in many of these markets. We believe our initial investments in drug delivery vehicles in 2002 (Mersana), metabolomics in 2006 (Metabolon), synthetic carbohydrates in 2007 (Ancora), oncolytic viruses in 2007 (BioVex) and therapeutic discovery platforms in 2007 (Ensemble), positioned us well to capture the growth of commercial interest in cancer therapeutics, vaccines and molecular diagnostics. Mersana and BioVex are in clinical trials with their respective treatments for cancer, and Metabolon generated record revenue in 2010. Additionally, we believe the acquisition of BioVex Group, Inc., by Amgen, Inc., on March 4, 2011, provided validation of commercial interest in the promise of oncolytic virus technology.

We also believe we have an emerging pipeline of companies that are developing solutions for growth markets that exist today or may develop in future years such as personalized medicine (Enumeral Biomedical). We made a new investment in a personalized medicine company, Champions Oncology (OTC:CSBR) in the second quarter of 2011. The table below shows the breakdown of our Healthcare portfolio as of June 30, 2011, based on stage of maturity of the investment including the year of our initial investment in each of the companies.

Healthcare	Level of Maturity		
	Early	Mid	Late
Companies	Enumeral(2010) Ancora(2007)	Champions Oncology(2011) Ensemble(2007) Mersana(2002)	Metabolon(2006)
Cost	\$6,021,914	\$7,913,220	\$4,500,000
Value	\$3,375,429	\$6,420,576	\$4,716,167
Percentage of Healthcare Portfolio	23.3%	44.2%	32.5%

Our Healthcare companies demonstrate progress and growth through different mechanisms depending on their respective businesses. Businesses that provide services, such as Metabolon, generate revenues from the commercial sale of these services. Businesses that enter into partnerships for discovery and development of therapeutics, vaccines and diagnostics may generate revenue from upfront fees, milestone payments and royalties on sales of approved products. Businesses that endeavor to advance a therapeutic, diagnostic or vaccine product through clinical trials may not generate revenue until an approved product is on the market, if ever. Progress for these types of companies can be measured by progress through clinical trials. We include some of the developments from these portfolio companies during the second quarter below.

Champions Oncology	In April 2011, Champions Oncology announced a round of financing through private placement led by Battery Ventures.
Enumeral	In June 2011, Enumeral completed its Series A round of financing led by us with participation from high-net-worth individual investors, a corporate investor and a venture capital firm.
Metabolon	In June 2011, Metabolon announced the publication of "Identification of Metabolites in the Normal Ovary and Their Transformation in Primary and Metastatic Ovarian Cancer." The biochemical changes observed provide insight into the biochemical consequences of transformation and provide candidate biomarkers of ovarian oncogenesis.

We believe the macroeconomic and microeconomic dynamics that supported our thesis for historical investments in healthcare and the potential for nanotechnology to impact healthcare-related markets will continue for the foreseeable future. Some of the market opportunities we are currently investigating for investment opportunities include molecular diagnostics, 3D biology, cellular therapy and tissue engineering.

Assessment of Electronics Portfolio as of June 30, 2011

We classify companies in our Electronics portfolio as those that use nanotechnology to address problems in electronics-related industries, including semiconductors, telecommunications and data communications, metrology and test and measurement. We believe macroeconomic and microeconomic trends including global connectivity, demand for increasing bandwidth due to pervasiveness of electronics in daily life, the desire to see not just hear, and need for real-time availability of data and demand for more functionality driven by increasing global prosperity create attractive investment opportunities in electronics. We believe nanotechnology enables innovation in electronics markets through:

- **New Methods of Production:** Nanotechnology enables continuation of Moore's Law for exponential increases of the number of integrated circuits in semiconductor devices.
- **New Materials:** New materials enable unique capabilities, performance and form-factors in electronic devices.
- **New Forms of Computation:** Nanotechnology enables methods of solving equations and other problems that would be difficult or impossible with standard digital computing techniques.

We continue to believe we are positioned well to take advantage of today's growth markets within electronics having been early investors in many of these markets. We believe our initial investments in non-volatile memory in 2001 and 2007 (Nantero and Adesto, respectively), transparent conductors in 2004 (Cambrionics), image sensors in 2006 (SiOnyx), integrated photonics in 2003 (NeoPhotonics) and metrology in 2006 (Xradia), positioned us well to capture the growth of commercial interest in smartphones and tablet computers with touchscreens, the exponential increase in demand for bandwidth for data and telecommunications and the demand for non-destructive imaging capabilities in a variety of industries.

We also believe we have an emerging pipeline of companies that are developing solutions for growth markets that exist today or may develop in future years such as high-performance computing enabled by quantum mechanics (D-Wave Systems) and radio-frequency identification and near-field communication devices enabled by printed electronics (Kovio). The table below shows the breakdown of our Electronics portfolio as of June 30, 2011, based on stage of maturity of the investment including the year of our initial investment in each of the companies.

Electronics	Level of Maturity		
	Early	Mid	Late
Companies		Adesto (2007) D-Wave (2006) SiOnyx (2006) Kovio (2005) Cambrios (2004) Polatis (2003) Nantero (2001)	Xradia (2006) Molecular Imprints (2004) NeoPhotonics (2003)
Cost	\$0	\$27,063,603	\$17,147,740
Value	\$0	\$25,781,745	\$15,745,614
Percentage of Electronics portfolio	0.0%	62.1%	37.9%

Many of our Electronics portfolio companies are generating commercial revenues and/or have entered into partnerships and joint development agreements with large corporations. We include some of the commercial developments from these portfolio companies during the second quarter below.

D-Wave Systems	In May 2011, D-Wave Systems announced Lockheed Martin Corporation entered into an agreement to purchase a quantum computing system from the company.
Cambrios	In April 2011, Synaptics and Cambrios signed a reference design partnership agreement to bring Cambrios' ClearOhm-based touch technology to the market. In July 2011, Hitachi Chemical and Cambrios signed a collaboration agreement to produce photosensitive transparent conductive films that can be patterned using simple light exposure rather than expensive patterning techniques.
Kovio	In June 2011, Kovio announced a round of financing led by Tyco Retail Solutions, a unit of Tyco International.
Adesto	In July 2011, Adesto announced the formation of a development and manufacturing partnership that will lead to the delivery of the first Conductive Bridging RAM-based devices in 2011.

We believe the macroeconomic and microeconomic dynamics that supported our thesis for historical investments in electronics and the potential for nanotechnology to impact electronics-related markets will continue for the foreseeable future, albeit with some adjustment. The high capital intensity of traditional semiconductor investments and the reduced values placed on these companies at exit in the current market environment have resulted in these investments becoming less favorable to investors, including ourselves. We are currently investigating opportunities that do not require such substantial capital investment to reach commercial revenues and breakeven cash flow.

Investment Objective

Our principal objective is to achieve long-term capital appreciation by making equity-focused venture capital investments. Therefore, a significant portion of our current venture capital investment portfolio provides little or no income in the form of dividends or interest. Current income is a secondary objective. We are implementing a strategy that we believe will provide greater regularity and shorter time periods between realizations of capital gains on investments. As part of this strategy, we are seeking to increase our current income by providing debt financing to privately held and publicly traded small companies. We seek to reach the point where future growth is financed through reinvestment of our capital gains from our venture capital investments and where current income offsets our annual expenses during periods of time between realizations of capital gains on our investments.

We currently earn interest income from fixed-income securities, including U.S. government and agency securities. The amount of interest income we earn varies with the average balance of our fixed-income portfolio and the average yield on this portfolio. In previous years, we have been able to generate substantial amounts of interest income from our holdings of U.S. Treasury securities. As of June 30, 2011, we held four U.S. Treasury securities with maturity dates of less than six months yielding approximately 0.09 percent. As of June 30, 2011, yields for 3-month, 6-month, and 12-month U.S. Treasury securities were 0.03 percent, 0.10 percent and 0.19 percent, respectively. With yields at this level, we expect to generate less interest income from U.S. government securities than in previous fiscal quarters and years.

Results of Operations

We present the financial results of our operations utilizing GAAP for investment companies. On this basis, the principal measure of our financial performance during any period is the net increase (decrease) in our net assets resulting from our operating activities, which is the sum of the following three elements:

Net Operating Income (Loss) - the difference between our income from interest, dividends, and fees and our operating expenses.

Net Realized Gain (Loss) on Investments - the difference between the net proceeds of sales of portfolio securities and their stated cost, plus income from interests in limited liability companies.

Net Increase (Decrease) in Unrealized Appreciation or Depreciation on Investments - the net unrealized change in the value of our investment portfolio.

Owing to the structure and objectives of our business, we generally expect to experience net operating losses and seek to generate increases in our net assets from operations through the long-term appreciation of our venture capital investments. We have relied, and continue to rely, primarily on proceeds from sales of investments, rather than on investment income, to defray a significant portion of our operating expenses. Because such sales are unpredictable, we attempt to maintain adequate working capital to provide for fiscal periods when there are no such sales. During 2010, we made our first venture debt investment. While the interest income generated from these investments does not currently defray a significant portion of our operating expenses, further investments in venture debt could generate more substantial investment income in future years.

The potential for, or occurrence of, inflation could result in rising interest rates for government-backed debt. This trend would have two effects on our business. First, the spread between the interest rates we can obtain from investing low-risk government debt versus high-risk venture debt will compress, which would result in a reduction of the risk premium associated with investments in venture debt. We may reduce the number and amount invested in venture debt should this risk premium decrease substantially as to not compensate us adequately for the risk associated with such investments. Second, funds drawn from our credit facility will accrue interest at a rate that fluctuates with the London Interbank Offered Rate (LIBOR). LIBOR is expected to increase in times of inflation. Our venture debt investments may include both fixed and floating interest rates. Our interest income would decrease if the spread between the interest rate on funds from our credit facility and our venture debt investments decrease.

Three months ended June 30, 2011, as compared with the three months ended June 30, 2010

In the three months ended June 30, 2011, and June 30, 2010, we had net increases in net assets resulting from operations of \$21,222,221 and \$2,150,952, respectively.

Investment Income and Expenses:

We had net operating losses of \$1,806,393 and \$1,953,949 for the three months ended June 30, 2011, and June 30, 2010, respectively. The variation in these results is primarily owing to the changes in investment income and operating expenses, including non-cash expense of \$557,806 in 2011 and \$661,666 in 2010 associated with the vesting of stock options. During the three months ended June 30, 2011, and 2010, total investment income was \$187,826 and \$129,208, respectively. During the three months ended June 30, 2011, and 2010, total operating expenses were \$1,994,219 and \$2,083,157, respectively.

During the three months ended June 30, 2011, as compared with the same period in 2010, investment income increased, reflecting an increase in interest income from bridge notes, non-convertible promissory notes, subordinated and senior secured debt, and the participation agreement, offset by a decrease in our average holdings of U.S. government securities and a decrease in the average yield of these securities. During the three months ended June 30, 2011, our average holdings of such securities were \$35,821,905, as compared with \$49,244,819 during the three months ended June 30, 2010. The average yield on our U.S. government securities decreased from 0.11 percent for the three months ended June 30, 2010, to 0.06 percent for the three months ended June 30, 2011.

Operating expenses, including non-cash, stock-based compensation expense, were \$1,994,219 and \$2,083,157 for the three months ended June 30, 2011, and June 30, 2010, respectively. The decrease in operating expenses for the three months ended June 30, 2011, as compared to the three months ended June 30, 2010, was primarily owing to decreases in salaries, benefits and stock-based compensation expense and administration and operations expense, offset by an increase in professional fees. Salaries, benefits and stock-based compensation expense decreased by \$120,739, or 8.2 percent, through June 30, 2011, as compared with June 30, 2010, primarily as a result of a decrease in non-cash expense of \$103,860 associated with the Harris & Harris Group, Inc. 2006 Equity Incentive Plan (the "Stock Plan") and a decrease in salaries and benefits owing primarily to a decrease in our head count. At June 30, 2011, we had 10 full-time employees, as compared with 11 full-time employees at June 30, 2010. While the non-cash, stock-based compensation expense for the Stock Plan accounted for \$557,806 of our operating expenses, this amount was offset by a corresponding increase to our additional paid-in capital, resulting in no net impact to our net asset value. The non-cash, stock-based compensation expense and corresponding increase to our additional paid-in capital may increase in future quarters. Administration and operations expense decreased by \$9,003, or 3.9 percent, through June 30, 2011, as compared with June 30, 2010, primarily as a result of a decrease in our directors' and officers' liability insurance expense and decreases in managing directors' travel-related expenses, offset by a one-time leasing commission expense associated with subletting our office space located 420 Florence Street, Suite 200, Palo Alto, CA, commencing on July 1, 2011. Professional fees increased by \$31,847, or 18.0 percent, for the three months ended June 30, 2011, as compared with the same period in 2010, primarily as a result of an increase in certain accounting and consulting fees. Our rent expense of \$89,500 for the three months ended June 30, 2011, includes \$95,599 of rent paid in cash net of \$6,099 non-cash rent expense, credits and abatements that we recognize on a straight-line basis over the lease term. For the quarter ended June 30, 2010, we had a loss of \$68,038 as a result of abandoning our lease at our former office prior to the end of the lease term that expired in April 2010.

Realized Income and Losses from Investments:

During the three months ended June 30, 2011, and June 30, 2010, we realized net losses on investments of \$2,172,269 and \$396,769, respectively.

During the three months ended June 30, 2011, we realized net losses of \$2,172,269, consisting primarily of realized losses on our investment in PolyRemedy, Inc., of \$204,206 and in Questech Corporation of \$1,966,591.

During the three months ended June 30, 2010, we realized net losses of \$396,769, consisting primarily of realized losses on a portion of our investment in Kovio, Inc., of \$257,007 and in Orthovita, Inc., of \$167,300, offset by realized gains on our investment in Satcon Technology Corporation of \$14,320.

Net Unrealized Appreciation and Depreciation of Portfolio Securities:

During the three months ended June 30, 2011, net unrealized appreciation on total investments increased by \$25,200,986, or 3,698.4 percent, from net unrealized appreciation of \$681,400 at March 31, 2011, to net unrealized appreciation of \$25,882,386 at June 30, 2011. During the three months ended June 30, 2010, net unrealized depreciation on total investments decreased by \$4,501,670, or 42.6 percent, from net unrealized depreciation of \$10,564,305 at March 31, 2010, to net unrealized depreciation of \$6,062,635 at June 30, 2010.

During the three months ended June 30, 2011, net unrealized appreciation on our venture capital investments increased by \$25,199,484, from net unrealized appreciation of \$681,639 at March 31, 2011, to net unrealized appreciation of \$25,881,123 at June 30, 2011, owing primarily to increases in the valuations of the following investments held:

Investment	Amount of Write-Up
Solazyme, Inc.	\$ 21,106,005
Adesto Technologies Corporation	4,130,000
Metabolon, Inc.	2,103,440
Cambrios Technologies Corporation	1,554,890
ABSMaterials, Inc.	937,500
Innovalight, Inc.	923,130
Bridgelux, Inc.	623,882
Molecular Imprints, Inc.	310,325
GEO Semiconductor, Inc.	36,410

held: The write-ups for the three months ended June 30, 2011, were offset by decreases in the valuations of the following investments

Investment	Amount of Write-Down
SiOnyx, Inc.	\$ 1,627,821
NeoPhotonics Corporation	1,507,438
Xradia, Inc.	1,316,792
D-Wave Systems, Inc.	1,129,575
Nanosys, Inc.	725,246
Ensemble Therapeutics Corporation	599,640
Mersana Therapeutics, Inc.	467,475
Laser Light Engines, Inc.	421,945
Ancora Pharmaceuticals Inc.	318,477
Cobalt Technologies, Inc.	250,587
Nextreme Thermal Solutions, Inc.	137,665
Champions Oncology, Inc.	53,333
Contour Energy Systems, Inc.	19,919
Kovio, Inc.	2,335
NanoTerra, Inc.	1,781

We had an increase in unrealized appreciation for PolyRemedy, Inc., of \$312,313 and for Questech Corporation of \$1,693,813 owing to the sale of these securities.

We had an increase in unrealized appreciation of \$24,831 on the rights to milestone payments from Amgen, Inc., from its acquisition of BioVex Group, Inc., in the first quarter of 2011.

We had an increase in unrealized appreciation owing to foreign currency translation of \$22,974 on our investment in D-Wave Systems, Inc.

During the three months ended June 30, 2010, net unrealized depreciation on our venture capital investments decreased by \$4,516,186, from net unrealized depreciation of \$10,561,039 at March 31, 2010, to net unrealized depreciation of \$6,044,853 at June 30, 2010, owing primarily to increases in the valuations of the following investments held:

Investment	Amount of Write-Up
Solazyme, Inc.	\$ 8,149,698
SiOnyx, Inc.	2,002,611
D-Wave Systems, Inc.	855,025
Xradia, Inc.	730,022
Laser Light Engines, Inc.	500,000
BioVex Group, Inc.	423,421

The write-ups for the three months ended June 30, 2010, were partially offset by decreases in the valuations of the following investments held:

Investment	Amount of Write-Down
Nextreme Thermal Solutions, Inc.	\$ 2,202,629
Molecular Imprints, Inc.	2,014,874
Bridgelux, Inc.	1,663,728
NeoPhotonics Corporation	1,548,863
Kovio, Inc.	335,675
Nanosys, Inc.	280,649
Questech Corporation	69,479
TetraVita Bioscience, Inc.	62,500
PolyRemedy, Inc.	53,893
Mersana Therapeutics, Inc.	14,109
Metabolon, Inc.	6,527

We had an increase in unrealized depreciation for Satcon Technology Corporation of \$5,797 owing to the sale of its securities.

We had a decrease in unrealized depreciation for Kovio, Inc., of \$227,469 owing to the termination of a warrant. The warrant was terminated pursuant to the terms of the Series A' financing which closed during the second quarter of 2010.

We had a decrease in unrealized depreciation for Orthovita, Inc., of \$648 owing to the sale of its securities.

We had an increase in unrealized depreciation owing to foreign currency translation of \$113,985 on our investment in D-Wave Systems, Inc.

Unrealized depreciation on our U.S. government securities portfolio increased from \$3,266 at March 31, 2010, to \$17,782 at June 30, 2010.

Six months ended June 30, 2011, as compared with the six months ended June 30, 2010

In the six months ended June 30, 2011, and June 30, 2010, we had net increases in net assets resulting from operations of \$20,096,062 and \$3,838,683, respectively.

Investment Income and Expenses:

We had net operating losses of \$3,641,696 and \$4,066,627 for the six months ended June 30, 2011, and June 30, 2010, respectively. During the six months ended June 30, 2011, and 2010, total investment income was \$324,650 and \$208,281, respectively. During the six months ended June 30, 2011, and 2010, total operating expenses were \$3,966,346 and \$4,274,908, respectively, including non-cash expense of \$985,120 in 2011 and \$1,214,938 in 2010 associated with the vesting of stock options.

During the six months ended June 30, 2011, as compared with the same period in 2010, investment income increased, reflecting an increase in interest income from bridge notes, non-convertible promissory notes, subordinated and senior secured debt, and the participation agreement, offset by a decrease in our average holdings of U.S. government securities. During the six months ended June 30, 2011, our average holdings of such securities were \$36,364,398, as compared with \$51,492,274 during the six months ended June 30, 2010. The average yield on our U.S. government securities for the six months ended June 30, 2011, and 2010, was 0.09 percent.

Operating expenses, including non-cash, stock-based compensation expense, were \$3,966,346 and \$4,274,908 for the six months ended June 30, 2011, and June 30, 2010, respectively. The decrease in operating expenses for the six months ended June 30, 2011, as compared to the six months ended June 30, 2010, was primarily owing to decreases in salaries, benefits and stock-based compensation expense and administration and operations expense, offset by an increase in professional fees and rent expense. Salaries, benefits and stock-based compensation expense decreased by \$270,918, or 9.5 percent, through June 30, 2011, as compared with June 30, 2010, primarily as a result of a decrease in non-cash expense of \$229,818 associated with the Stock Plan and a decrease in salaries and benefits owing primarily to a decrease in our head count. At June 30, 2011, we had 10 full-time employees, as compared with 11 full-time employees at June 30, 2010. While the non-cash, stock-based compensation expense for the Stock Plan increased our operating expenses by \$985,120, this increase was offset by a corresponding increase to our additional paid-in capital, resulting in no net impact to our net asset value. The non-cash, stock-based compensation expense and corresponding increase to our additional paid-in capital may increase in future quarters. Administration and operations expense decreased by \$34,967, or 6.8 percent, through June 30, 2011, as compared with June 30, 2010, primarily as a result of a decrease in our directors' and officers' liability insurance expense, decreases in the cost of non-employee-related insurance and decreases in managing directors' travel-related expenses, offset by a one-time leasing commission expense associated with subletting our office space located 420 Florence Street, Suite 200, Palo Alto, CA, commencing on July 1, 2011. Professional fees increased by \$36,326, or 8.6 percent, for the six months ended June 30, 2011, as compared with the same period in 2010, primarily as a result of an increase in certain accounting and consulting fees, offset by a reduction in certain legal fees. Rent expense increased by \$12,640, or 7.6 percent, for the period ended June 30, 2011, as compared with the six months ended June 30, 2010. Our rent expense of \$179,000 for the six months ended June 30, 2011, includes \$190,497 of rent paid in cash net of \$11,497 non-cash rent expense, credits and abatements that we recognize on a straight-line basis over the lease term. For the six months ended June 30, 2010, we had a loss of \$68,038 as a result of abandoning our lease at our former office prior to the end of the lease term which expired in April 2010.

Realized Income and Losses from Investments:

During the six months ended June 30, 2011, we realized net gains on investments of \$5,362,071, as compared with realized net losses on investments of \$408,292 during the six months ended June 30, 2010.

During the six months ended June 30, 2011, we realized net gains of \$5,362,071, consisting primarily of realized gains on our investments in BioVex Group, Inc., of \$7,509,340 and in Siluria Technologies, Inc., of \$25,000, offset by realized losses on our investments in PolyRemedy, Inc., of \$204,206 and in Questech Corporation of \$1,966,591.

During the six months ended June 30, 2010, we realized net losses of \$408,292, consisting primarily of realized losses on a portion of our investment in Kovio, Inc., of \$257,007, in Orthovita, Inc., of \$167,300, and realized losses on the disposal of fixed assets, offset by realized gains on our investment in Satcon Technology Corporation of \$14,320 and realized gains on the sale of U.S. government securities.

Net Unrealized Appreciation and Depreciation of Portfolio Securities:

During the six months ended June 30, 2011, net unrealized appreciation on total investments increased by \$18,378,080, or 244.9 percent, from net unrealized appreciation of \$7,504,306 at December 31, 2010, to net unrealized appreciation of \$25,882,386 at June 30, 2011. During the six months ended June 30, 2010, net unrealized depreciation on total investments decreased by \$8,316,234, or 57.8 percent, from net unrealized depreciation of \$14,378,869 at December 31, 2009, to net unrealized depreciation of \$6,062,635 at June 30, 2010.

During the six months ended June 30, 2011, net unrealized appreciation on our venture capital investments increased by \$18,378,085, from net unrealized appreciation of \$7,503,038 at December 31, 2010, to net unrealized appreciation of \$25,881,123 at June 30, 2011, owing primarily to increases in the valuations of the following investments held:

<u>Investment</u>	<u>Amount of Write-Up</u>
Solazyme, Inc.	\$ 21,129,046
Adesto Technologies Corporation	4,130,000
BridgeLux, Inc.	2,260,618
Metabolon, Inc.	2,098,023
CambriosTechnologies Corporation	1,554,890
ABSMaterials, Inc.	937,500
Innovalight, Inc.	844,348
Kovio, Inc.	620,397
Molecular Imprints, Inc.	299,200
Cobalt Technologies, Inc.	254,693
Enumeral Biomedical Corp.	83,333
GEO Semiconductor, Inc.	49,733
NanoTerra, Inc.	795

The write-ups for the six months ended June 30, 2011, were offset by decreases in the valuations of the following investments held:

Investment	Amount of Write-Down
Xradia, Inc.	\$ 2,065,542
NeoPhotonics Corporation	1,859,210
SiOnyx, Inc.	1,629,058
D-Wave Systems, Inc.	1,129,575
Ancora Pharmaceuticals Inc.	955,432
Nanosys, Inc.	725,246
Ensemble Therapeutics Corporation	599,640
Mersana Therapeutics, Inc.	467,475
Laser Light Engines, Inc.	421,945
Nextreme Thermal Solutions, Inc.	412,993
Contour Energy Systems, Inc.	206,118
Champions Oncology, Inc.	53,333

We had an increase in unrealized appreciation for PolyRemedy, Inc., of \$312,313 and for Questech Corporation of \$1,632,310, owing to realized losses on the sale of these securities.

We had an increase in unrealized appreciation of \$24,831 on the rights to milestone payments from Amgen, Inc., from its acquisition of BioVex Group, Inc., in the first quarter of 2011.

We had a decrease in unrealized appreciation for BioVex Group, Inc., of \$7,467,615, which resulted from a realized gain on the sale of its securities.

We had an increase in unrealized appreciation owing to foreign currency translation of \$139,237 on our investment in D-Wave Systems, Inc.

During the six months ended June 30, 2010, net unrealized depreciation on our venture capital investments decreased by \$8,321,573, from net unrealized depreciation of \$14,366,426 at December 31, 2009, to net unrealized depreciation of \$6,044,853 at June 30, 2010, owing primarily to increases in the valuations of the following investments held:

Investment	Amount of Write-Up
Solazyme, Inc.	\$ 8,149,698
SiOnyx, Inc.	3,078,765
Xradia, Inc.	1,330,469
Mersana Therapeutics, Inc.	961,704
D-Wave Systems, Inc.	855,025
Ensemble Therapeutics Corporation	500,000
Laser Light Engines, Inc.	500,000
BioVex Group, Inc.	421,422
Metabolon, Inc.	69,635

The write-ups for the six months ended June 30, 2010, were partially offset by decreases in the valuations of the following investments held:

Investment	Amount of Write-Down
Nextreme Thermal Solutions, Inc.	\$ 3,303,943
Molecular Imprints, Inc.	2,023,124
Kovio, Inc.	1,750,165
Nanosys, Inc.	280,649
Bridgelux, Inc.	220,253
PolyRemedy, Inc.	107,786
TetraVita Bioscience, Inc.	62,500
Questech Corporation	62,269
NeoPhotonics Corporation	5,111

We had a decrease in unrealized depreciation for Kovio, Inc., of \$227,469 owing to the termination of a warrant. The warrant was terminated pursuant to the terms of the Series A' financing which closed during the second quarter of 2010.

We had a decrease in unrealized depreciation for Orthovita, Inc., of \$72,432 owing to the sale of its securities.

We had an increase in unrealized depreciation owing to foreign currency translation of \$29,246 on our investment in D-Wave Systems, Inc.

Unrealized depreciation on our U.S. government securities portfolio increased from \$12,443 at December 31, 2009, to \$17,782 at June 30, 2010.

Financial Condition

June 30, 2011

At June 30, 2011, our total assets and net assets were \$173,384,222 and \$168,426,152, respectively. At December 31, 2010, they were \$149,289,168 and \$146,853,912, respectively.

At June 30, 2011, our net asset value per share was \$5.43, as compared with \$4.76 at December 31, 2010. At June 30, 2011, our shares outstanding increased to 31,000,601 from 30,878,164 at December 31, 2010. Our shares outstanding increased due to the exercise of 122,437 options. These option exercises provided \$491,058 of cash to the Company.

Significant developments in the six months ended June 30, 2011, included an increase in the holdings of our venture capital investments of \$25,736,860 and decreases in our holdings of U.S. government obligations and cash of \$4,531,354. The increase in the value of our venture capital investments from \$106,150,422 at December 31, 2010, to \$131,887,282 at June 30, 2011, resulted primarily from an increase in the net value of our venture capital investments of \$23,901,077, owing primarily to the increase in value of Solazyme, Inc., following completion of its IPO, and by three new and 17 follow-on investments of \$10,657,586, offset by the sale of our securities in BioVex Group, Inc., PolyRemedy, Inc., Questech Corporation and Siluria Technologies, Inc. The decrease in the value of our U.S. government obligations and cash from \$42,031,536 at December 31, 2010, to \$37,500,182 at June 30, 2011, is primarily owing to the payment of cash for operating expenses of \$2,860,329 and to new and follow-on venture capital investments totaling \$10,657,586, offset by cash received from the sale of our securities in BioVex Group, Inc., PolyRemedy, Inc., Questech Corporation and Siluria Technologies, Inc.

The following table is a summary of additions to our portfolio of venture capital investments made during the six months ended June 30, 2011:

New Investments	Amount of Investment
Champions Oncology, Inc.	\$ 2,000,000
NanoTerra, Inc.	750,000
Produced Water Absorbents, Inc.	1,000,000
Follow-On Investments	Amount of Investment
Adesto Technologies Corporation	\$ 445,659
Ancora Pharmaceuticals Inc.	200,000
Ancora Pharmaceuticals Inc.	100,000
Bridgelux, Inc.	813,805
Cobalt Technologies, Inc.	121,560
Contour Energy Systems, Inc.	720,000
Enumeral Biomedical Corp.	650,000
Enumeral Biomedical Corp.	99,999
NeoPhotonics Corporation	550,000
GEO Semiconductor, Inc.	150,000
Innovalight, Inc.	272,369
Innovalight, Inc.	181,579
Kovio, Inc.	892,315
Mersana Therapeutics, Inc.	298,900
Molecular Imprints, Inc.	866,668
Molecular Imprints, Inc.	481,482
Ultora, Inc.	63,250
Total	\$ 10,657,586

The following tables summarize the values of our portfolios of venture capital investments and U.S. government obligations, as compared with their cost, at June 30, 2011, and December 31, 2010:

	June 30, 2011	December 31, 2010
Venture capital investments, at cost	\$ 106,006,159	\$ 98,647,384
Net unrealized appreciation ⁽¹⁾	25,881,123	7,503,038
Venture capital investments, at value	\$ 131,887,282	\$ 106,150,422

	<u>June 30, 2011</u>	<u>December 31, 2010</u>
U.S. government obligations, at cost	\$ 32,197,584	\$ 38,273,349
Net unrealized appreciation ⁽¹⁾	1,263	1,268
U.S. government obligations, at value	<u>\$ 32,198,847</u>	<u>\$ 38,274,617</u>

⁽¹⁾At June 30, 2011, and December 31, 2010, the net accumulated unrealized appreciation on investments was \$25,882,386 and \$7,504,306, respectively.

Liquidity

Our liquidity and capital resources are generated and are generally available through our cash holdings, interest earned on our investments on U.S. government securities, cash flows from the sales of U.S. government securities and payments received on our venture debt investments, proceeds from periodic follow-on equity offerings and realized capital gains retained for reinvestment.

We fund our day-to-day operations using interest earned and proceeds from our cash holdings, the sales of our investments in U.S. government securities and interest earned from our venture debt securities. We believe the increase or decrease in the value of our venture capital investments does not materially affect the day-to-day operations of the Company or our daily liquidity. At June 30, 2011, and December 31, 2010, we had no investments in money market mutual funds.

We have a \$10 million three-year revolving credit facility with TD Bank, N.A. This credit facility is used to fund our venture debt investments and not for the payment of day-to-day operating expenses. As of June 30, 2011, we had debt outstanding of \$2,550,000, which is less than two percent of our net assets. This debt is collateralized with cash held in a restricted account on a one-for-one basis with the amount of debt outstanding from the credit facility. Therefore, repayment of the outstanding debt as of June 30, 2011, would not have a significant impact on our daily liquidity. We have not issued any debt securities, and, therefore, are not subject to credit agency downgrades.

As a venture capital company, it is critical that we have capital available to support our best companies until we have an opportunity for liquidity in our investments. As such, we will continue to maintain a substantial amount of liquid capital on our balance sheet. However, to complement our equity-focused portfolio investing, we seek to invest some of this capital in venture debt where we will have more defined investment return timelines than we currently have in our existing portfolio. In addition, we may from time to time opt to borrow money to make investments, specifically in debt securities that generate cash flow and have a known timeframe for return on investment.

At June 30, 2011, and December 31, 2010, our total net primary liquidity was \$37,560,664 and \$42,079,934, respectively. Our primary liquidity is comprised of our cash, U.S. government securities, receivables from unsettled trades, receivables from portfolio companies, taxes receivables and interest receivables. The decrease in our primary liquidity from December 31, 2010, to June 30, 2011, is primarily owing to the use of funds for investments and payment of net operating expenses offset by the sale of investments.

At June 30, 2011, and December 31, 2010, our secondary liquidity was \$49,241,940 and \$0, respectively. Our secondary liquidity consists of our publicly traded securities. Although these companies are publicly traded, their stock may not trade at high volumes and prices can be volatile, which may restrict our ability to sell our positions at any given time. We may also be restricted for a period of time in selling our positions in these companies due to lock-up provisions or due to our shares being unregistered.

We believe that the difficult venture capital environment may continue to adversely affect the valuation of investment portfolios, tighter lending standards and reduced access to capital. These conditions may lead to a further decline in net asset value and/or decline in valuations of our portfolio companies. Although we cannot predict future market conditions, we continue to believe that our current cash and U.S. government security holdings and our ability to adjust our investment pace will provide us with adequate liquidity to execute our current business strategy.

Except for a rights offering, we are also generally not able to issue and sell our common stock at a price below our net asset value per share, exclusive of any distributing commission or discount, without shareholder approval. As of June 30, 2011, our net asset value per share was \$5.43 per share and our closing market price was \$5.13 per share. We do not currently have shareholder approval to issue or sell shares below our net asset value per share.

Borrowings

On February 24, 2011, we established a new \$10 million three-year revolving credit facility with TD Bank, N.A., to be used in conjunction with our venture debt investments.

The credit facility, among other things, matures on February 24, 2014, and generally bears interest, at the Company's option, based on (i) LIBOR plus 1.25 percent or (2) the higher of the federal funds rate plus fifty basis points (0.50 percent) or the U.S. prime rate as published in the Wall Street Journal. The credit facility generally requires payment of interest on a monthly basis and requires the payment of a non-use fee of 0.15 percent annually. All outstanding principal is due upon maturity. The credit facility is secured by cash collateral to be held in a non-interest bearing account at TD Bank. The credit facility contains affirmative and restrictive covenants, including: (a) periodic financial reporting requirements, (b) maintaining our status as a BDC (c) maintaining unencumbered, liquid assets of not less than \$7,500,000, (d) limitations on the incurrence of additional indebtedness, (e) limitations on liens, and (f) limitations on mergers and dissolutions. The credit facility is used to supplement our capital to make additional venture debt investments.

The Company's outstanding debt balance was \$2,550,000 and \$0, at June 30, 2011, and December 31, 2010, respectively. The annual weighted average interest cost for the six months ended June 30, 2011, was 1.5269 percent, exclusive of closing fees and for other prepaid expenses related to establishing the credit facility. The remaining capacity under the credit facility was \$7,450,000 at June 30, 2011. At June 30, 2011, the Company was in compliance with all financial covenants required by the credit facility.

Contractual Obligations

A summary of our significant contractual payment obligations is as follows:

Payments Due by Period

	Total	Less than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Revolving credit facility ⁽¹⁾	\$ 2,550,000	\$ —	\$ 2,550,000	\$ —	\$ —
Operating leases	\$ 2,540,736	\$ 326,475	\$ 888,828	\$ 570,716	\$ 754,717

⁽¹⁾ As of June 30, 2011, we had \$7,450,000 of unused borrowing capacity under our credit facility.

Capital Resources

On October 9, 2009, we completed the sale of 4,887,500 shares of our common stock at a price of \$4.75 per share to the public for total gross proceeds of \$23,215,625; net proceeds of this offering, after deducting underwriting discounts and offering costs of \$2,000,413, were \$21,215,212. Through June 30, 2011, we used all of the net proceeds from this offering to make new investments, as well as for follow-on investments in our existing venture capital investments and for working capital.

Critical Accounting Policies

The Company's significant accounting policies are described in Note 3 to the Consolidated Financial Statements and in the Footnote to the Consolidated Schedule of Investments. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and those that require management's most difficult, complex or subjective judgments. The Company considers the following accounting policies and related estimates to be critical:

Valuation of Portfolio Investments

The most significant estimate inherent in the preparation of our consolidated financial statements is the valuation of investments and the related amounts of unrealized appreciation and depreciation of investments recorded. As a BDC, we invest in primarily illiquid securities that generally have no established trading market.

Investments are stated at "value" as defined in the 1940 Act and in the applicable regulations of the SEC and GAAP. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) the fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. (See "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments.") As of June 30, 2011, our financial statements include venture capital investments valued at \$131,887,282, the fair values of which were determined in good faith by, or under the direction of, the Board of Directors. As of June 30, 2011, approximately 78.3 percent of our net assets represent investments in portfolio companies at fair value by the Board of Directors.

Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment, although our valuation policy is intended to provide a consistent basis for determining fair value of the portfolio investments. Factors that may be considered include, but are not limited to, the cost of the Company's investment; transactions in the portfolio company's securities or unconditional firm offers by responsible parties; the financial condition and operating results of the company; the long-term potential of the business and technology of the company; the values of similar securities issued by companies in similar businesses; multiples to revenues, net income or EBITDA that similar securities issued by companies in similar businesses receive; the proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under the applicable securities laws; the achievement of milestones; discounts for restrictions on transfers of publicly traded securities; and the rights and preferences of the class of securities we own as compared with other classes of securities the portfolio has issued.

In addition, with respect to our debt investments for which no readily available market quotations are available, we will generally consider the financial condition and current and expected future cash flows of the portfolio company; the creditworthiness of the portfolio company and its ability to meet its current debt obligations; the relative seniority of our debt investment within the portfolio company's capital structure; the availability and value of any available collateral; and changes in market interest rates and credit spreads for similar debt investments.

Historically, difficult venture capital environments have resulted in companies not receiving financing and being subsequently closed down with a loss of investment to venture investors, and other companies receiving financing but at significantly lower valuations than the preceding rounds, leading to very deep dilution for those who do not participate in the new rounds of investment. Our best estimate of this non-performance risk has been quantified and included in the valuation of our portfolio companies as of June 30, 2011.

All investments recorded at fair value are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels related to the amount of subjectivity associated with the inputs to fair valuation of these assets, are as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Unobservable inputs for the asset or liability.

As of June 30, 2011, all of our portfolio company investments were classified as Level 3 in the hierarchy, indicating a high level of judgment required in their valuation.

The values assigned to our assets are based on available information and do not necessarily represent amounts that might ultimately be realized, as these amounts depend on future circumstances and cannot be reasonably determined until the individual investments are actually liquidated or become readily marketable. Upon sale of investments, the values that are ultimately realized may be different from what is presently estimated. This difference could be material.

Stock-Based Compensation

Determining the appropriate fair-value model and calculating the fair value of share-based awards on the date of grant requires judgment. Historically, we have used the Black-Scholes-Merton option pricing model to estimate the fair value of employee stock options.

Management uses the Black-Scholes-Merton option pricing model in instances where we lack historical data necessary for more complex models and when the share award terms can be valued within the model. Other models may yield fair values that are significantly different from those calculated by the Black-Scholes-Merton option pricing model.

Management uses a binomial lattice option pricing model in instances where it is necessary to include a broader array of assumptions. We used the binomial lattice model for the 10-year NQSOs granted on March 18, 2009. These awards included accelerated vesting provisions that were based on market conditions. At the date of the grant, management's analysis concluded that triggering of the market condition acceleration clause was probable.

Option pricing models require the use of subjective input assumptions, including expected volatility, expected life, expected dividend rate, and expected risk-free rate of return. Variations in the expected volatility or expected term assumptions have a significant impact on fair value. As the volatility or expected term assumptions increase, the fair value of the stock option increases. The expected dividend rate and expected risk-free rate of return are not as significant to the calculation of fair value. A higher assumed dividend rate yields a lower fair value, whereas higher assumed interest rates yield higher fair values for stock options.

In the Black-Scholes-Merton model, we use the simplified calculation of expected term as described in the SEC's Staff Accounting Bulletin 107 because of the lack of historical information about option exercise patterns. In the binomial lattice model, we use an expected term that assumes the options will be exercised at two-times the strike price because of the lack of option exercise patterns. Future exercise behavior could be materially different than that which is assumed by the model.

Expected volatility is based on the historical fluctuations in the Company's stock. The Company's stock has historically been volatile, which increases the fair value of the underlying share-based awards.

GAAP requires us to develop an estimate of the number of share-based awards that will be forfeited owing to employee turnover. Quarterly changes in the estimated forfeiture rate can have a significant effect on reported share-based compensation, as the effect of adjusting the rate for all expense amortization after the grant date is recognized in the period the forfeiture estimate is changed. If the actual forfeiture rate proves to be higher than the estimated forfeiture rate, then an adjustment will be made to increase the estimated forfeiture rate, which would result in a decrease to the expense recognized in the financial statements. If the actual forfeiture rate proves to be lower than the estimated forfeiture rate, then an adjustment will be made to decrease the estimated forfeiture rate, which would result in an increase to the expense recognized in the financial statements. Such adjustments would affect our operating expenses and additional paid-in capital, but would have no effect on our net asset value.

Pension and Post-Retirement Benefit Plan Assumptions

The Company provides a Retiree Medical Benefit Plan for employees who meet certain eligibility requirements. Until it was terminated on May 5, 2011, the Company also provided an Executive Mandatory Retirement Benefit Plan for certain individuals employed by us in a bona fide executive or high policy-making position. Our former President accrued benefits under this plan prior to his retirement, and the termination has no impact on his accrued benefits. Several statistical and other factors that attempt to anticipate future events are used in calculating the expense and liability values related to our post-retirement benefit plans. These factors include assumptions we make about the discount rate, the rate of increase in healthcare costs, and mortality, among others.

The discount rate reflects the current rate at which the post-retirement medical benefit and pension liabilities could be effectively settled considering the timing of expected payments for plan participants. In estimating this rate, we consider the Citigroup Pension Liability Index in the determination of the appropriate discount rate assumptions. The weighted average rate we utilized to measure our post retirement medical benefit obligation as of December 31, 2010, and to calculate our 2011 expense was 5.68 percent. We used a discount rate of 5.75 percent to calculate our pension obligation for the Executive Mandatory Retirement Benefit Plan.

Recent Developments - Portfolio Companies

On July 6, 2011, the Company made a \$1,032,058 follow-on investment in a privately held, equity-focused portfolio company.

On July 21, 2011, Innovalight, Inc., was sold to E. I. du Pont de Nemours and Company ("DuPont"). On July 21, 2011, we received repayment of our outstanding bridge notes of Innovalight plus accrued but unpaid interest of \$458,569. On August 5, we received our payment of \$4,088,820 for our shares of Innovalight, which did not include \$948,894 held in escrow.

On July 27, 2011, the Company made a \$500,000 follow-on investment in a privately held, equity-focused portfolio company.

As of June 30, 2011, we owned an aggregate of 2,304,149 shares of Solazyme. This position was valued at \$44,354,868 as of June 30, 2011. The key inputs to our valuation of Solazyme were the share price as of the close of trading on June 30, 2011, which was \$22.97, less a liquidity discount owing to the lock-up restrictions placed on the shares through an agreement with the underwriters of the IPO. As of August 5, 2011, Solazyme's closing price was \$17.61 per share.

Forward-Looking Statements

The information contained herein may contain "forward-looking statements" based on our current expectations, assumptions and estimates about us and our industry. These forward-looking statements involve risks and uncertainties. Words such as "believe," "anticipate," "estimate," "expect," "intend," "plan," "will," "may," "might," "could," "continue" and other similar expressions identify forward-looking statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of several factors more fully described in "Risk Factors" and elsewhere in this Form 10-Q, and in our Form 10-K for the year ended December 31, 2010. The forward-looking statements made in this Form 10-Q relate only to events as of the date on which the statements are made. We undertake no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our business activities contain elements of risk. We consider the principal types of market risk to be valuation risk, interest rate risk and foreign currency risk. Although we are risk-seeking rather than risk-averse in our investments, we consider the management of risk to be essential to our business.

Valuation Risk

Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which market quotations are readily available and (ii) fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. (See the "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments" contained in "Item 1. Consolidated Financial Statements.")

Because there is typically no public market for our interests in the small privately held companies in which we invest, the valuation of the securities in that portion of our portfolio is determined in good faith by our Board of Directors with the assistance of our Valuation Committee, comprised of the independent members of our Board of Directors, in accordance with our Valuation Procedures. In the absence of a readily ascertainable market value, the determined value of our portfolio of securities may differ significantly from the values that would be placed on the portfolio if a ready market for such securities existed. Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment, although our valuation policy is intended to provide a consistent basis for determining fair value of the portfolio investments. Factors that may be considered include, but are not limited to, readily available public market quotations; the cost of the Company's investment; transactions in the portfolio company's securities or unconditional firm offers by responsible parties; the financial condition and operating results of the company; the long-term potential of the business and technology of the company; the values of similar securities issued by companies in similar businesses; multiples to revenues, net income or EBITDA that similar securities issued by companies in similar businesses receive; the proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under the applicable securities laws; the achievement of milestones; discounts for restrictions on transfers of publicly traded securities; and the rights and preferences of the class of securities we own as compared with other classes of securities the portfolio company has issued.

In addition, with respect to our debt investments for which no readily available market quotations are available, we will generally consider the financial condition and current and expected future cash flows of the portfolio company; the creditworthiness of the portfolio company and its ability to meet its current debt obligations; the relative seniority of our debt investment within the portfolio company's capital structure; the availability and value of any available collateral; and changes in market interest rates and credit spreads for similar debt investments. Any changes in valuation are recorded in our Consolidated Statements of Operations as "Net increase (decrease) in unrealized appreciation on investments." Changes in valuation of any of our investments in privately held companies from one period to another may be volatile.

Investments in privately held, immature companies are inherently more volatile than investments in more mature businesses. Such immature businesses are inherently fragile and easily affected by both internal and external forces. Our investee companies can lose much or all of their value suddenly in response to an internal or external adverse event. Conversely, these immature businesses can gain suddenly in value in response to an internal or external positive development.

The values assigned to our assets are based on available information and do not necessarily represent amounts that might ultimately be realized, as these amounts depend on future circumstances and cannot be reasonably determined until the individual investments are actually liquidated or become readily marketable. Upon sale of investments, the values that are ultimately realized may be different from what is presently estimated. This difference could be material.

Interest Rate Risk

Interest rate sensitivity refers to the change in earnings that may result from changes in the level of interest rates. As of June 30, 2011, our venture debt investments were at fixed rates. A change in interest rates would, therefore, not have a material effect on our gross investment income. In the future, some of our venture debt investments may be at variable rates. Because we intend to fund a portion of our venture debt investments with borrowings, our net investment income will be affected by the difference between the rate at which we invest and the rate at which we borrow. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in future quarters. As of June 30, 2011, we had \$2,550,000 of debt outstanding on our \$10 million credit facility that was used to fund our venture debt investments.

We generally also invest in both short and long-term U.S. government and agency securities. To the extent that we invest in short- and long-term U.S. government and agency securities, changes in interest rates result in changes in the value of these obligations that result in an increase or decrease of our net asset value. The level of interest rate risk exposure at any given point in time depends on the market environment, the expectations of future price and market movements, and the quantity and duration of long-term U.S. government and agency securities held by the Company, and it will vary from period to period. If the average interest rate on U.S. government securities at June 30, 2011, were to increase by 25, 75 and 150 basis points, the average value of these securities held by us at June 30, 2011, would decrease by approximately \$80,497, \$241,491 and \$482,983, respectively, and the portion of our net asset value attributable to such securities would decrease correspondingly.

In addition, market interest rates for high-yield corporate debt are an input in determining value of our investments in debt securities of privately held and publicly traded companies. Significant changes in these market rates could affect the value of our debt securities as of the date of measurement of value.

Foreign Currency Risk

Most of our investments are denominated in U.S. dollars. We currently have one investment denominated in Canadian dollars. We are exposed to foreign currency risk related to potential changes in foreign currency exchange rates. The potential loss in fair value on this investment resulting from a 10 percent adverse change in quoted foreign currency exchange rates is \$400,489 at June 30, 2011.

Item 4. Controls and Procedures

(a) *Disclosure Controls and Procedures.* As of the end of the period covered by this report, the Company's management, under the supervision and with the participation of our chief executive officer and chief financial officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as required by Rules 13a-15 of the 1934 Act). Disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the 1934 Act is recorded, processed, summarized and reported, within time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the issuer's management, as appropriate, to allow timely decisions regarding required disclosures. As of June 30, 2011, based upon this evaluation of our disclosure controls and procedures, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective.

(b) *Changes in Internal Control Over Financial Reporting.* There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the second quarter of 2011 to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Investing in our common stock involves significant risks relating to our business and investment objective. You should carefully consider the risks and uncertainties described in our Annual Report on Form 10-K for the year ended December 31, 2010, before you purchase any of our common stock.

The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Unknown additional risks and uncertainties, or ones that we currently consider immaterial, may also impair our business. If any of these risks or uncertainties materialize, our business, financial condition or results of operations could be materially adversely affected. In this event, the trading price of our common stock could decline, and you could lose all or part of your investment.

Approximately 34.9 percent of the net asset value attributable to our equity-focused venture capital investment portfolio, or 26.3 percent of our net asset value, as of June 30, 2011, is concentrated in one company, Solazyme, Inc.

At June 30, 2011, we valued our investment in Solazyme, Inc., which had a historical cost to us of \$5,444,197, at \$44,354,868, or 34.9 percent of the net asset value attributable to our equity-focused venture capital investment portfolio, excluding our rights to potential future milestone payments from the sale of BioVex Group, Inc., to Amgen, Inc., or 26.3 percent of our net asset value. Solazyme is now publicly traded on the Nasdaq Global Select Market. As of June 30, 2011, we owned an aggregate of 2,304,149 shares of Solazyme. The key inputs to our valuation of Solazyme as of June 30, 2011, were the share price as of the close of trading on June 30, 2011, which was \$22.97, less a liquidity discount owing to the lock-up restrictions placed on the shares through an agreement with the underwriters of the IPO. Any downturn in the business outlook of Solazyme, any failure of the products of Solazyme to receive widespread acceptance in the marketplace, any broad decrease in value of the public markets or negative events in the biofuel or algae-derived oil industry sectors could have a significant effect on our specific investment in Solazyme, and the overall value of our portfolio, and could have a significant adverse effect on the value of our common stock. As of August 5, 2011, Solazyme's closing price was \$17.61 per share.

The downgrade in the U.S. credit rating could materially adversely affect our business, financial conditions and results of operations.

On August 5, 2011, Standard & Poor's downgraded the U.S. credit rating to AA+ from its top rank of AAA. The current U.S. debt ceiling and budget deficit concerns have increased the possibility of other credit-rating agency downgrades and an economic slowdown. The downgrade of the U.S. credit rating could have a material adverse effect on the financial markets and economic conditions in the United States and throughout the world. Additionally, austerity measures necessary to reduce the deficit could accelerate an already slowing economy in the near term.

Downgrading of the U.S. credit rating could negatively impact the trading market for U.S. government securities and would likely impact the credit risk associated with our investments in U.S. Treasury securities. This could reduce the value of the U.S. Treasury securities in our portfolio. In addition, adverse market and economic conditions that could occur due to a downgrade of the U.S. credit rating on the United States' debt could result in rapidly rising interest rates, a falling dollar, shakier financial markets and slowing or negative economic growth in the near term. These events could adversely affect our business in many ways, including, but not limited to, adversely impacting our portfolio companies' ability to obtain financing, or obtaining financing but at significantly lower valuations than the preceding financing rounds. Market disturbances could also affect the value of our publicly traded portfolio companies, which as of June 30, 2011, accounted for 38.7 percent of the equity-focused venture capital portfolio. If any of these events were to occur, it could materially adversely affect our business, financial condition and results of operations.

EXHIBIT INDEX

Exhibit No.	Description
31.01	Certification of CEO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.02	Certification of CFO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32	Certification of CEO and CFO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

**Certification of Chief Executive Officer
Pursuant to Exchange Act Rule 13a-14(a) or 15d-14(a)**

I, Douglas W. Jamison, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Harris & Harris Group, Inc.;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
-

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

/s/ Douglas W. Jamison

Name: Douglas W. Jamison

Title: Chief Executive Officer

Date: August 8, 2011

**Certification of Chief Financial Officer
Pursuant to Exchange Act Rule 13a-14(a) or 15d-14(a)**

I, Daniel B. Wolfe, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Harris & Harris Group, Inc.;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
-

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of CEO and CFO Pursuant to
18 U.S.C. Section 1350,
as Adopted Pursuant to
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Quarterly Report on Form 10-Q of Harris & Harris Group, Inc. (the "Company") for the quarter ended June 30, 2011, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Douglas W. Jamison, as Chief Executive Officer of the Company, and Daniel B. Wolfe, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
 - (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
